

Selectmen's Meeting, Monday, June 21, 1982

Present, Katherine Ring, Chairman, Leslie MacNeil, John Jones & Betty Shaw, Secretary.

The Selectmen met at 7:30 to sign checks, abatements etc. One building permit was signed the other was returned and owner advised to make an appointment with the BOA.

Contracts with United Appraisals was signed but before being turned over to United Appraisals, Lloyd is to look over the contract and advise any changes to be made.

Ben Pratt spoke to the selectmen in regard to a fence which the water commissioners see as a problem by the sewer plant. Mrs. McCann has asked for the area to be cleaned up. K. Ring and L. MacNeil would rather not see the fence removed at this time although that is the wish of the Sewer Commissioners. Mrs. McCann will be told that the Conservation Committee will be looking into the matter. Selectmen took the opportunity to tell the sewer commissioner that the sewer dept took over the duties of the precinct when the town approved article #8 in the 1980 town report.

George Cole asked the selectmen about the possibility of purchase of a ~~roller~~^{roller} for the town for \$600. He has it on approval from another town and finds it would be useful to the Town and end in savings to the town in the future. Selectmen will talk it over and will give him a decision soon.

Culvert up by Putnman's has collapsed and will need to be replaced. Mr. Randall is very happy with the repairs that the highway crew did to his place. High St. and Elm St are all that is left for George to finish up on the Pandelena's punch list.

Mr. Scheyd showed the selectmen the final plans for the Gregg Lake Dam. He left two sets with the selectmen. If others needed he will drop them off at the office. A letter is to go out to all prospective bidders and a set of plans can be obtained for \$10. Water Rescourse recommended ston fill which would jump the cost \$1900.

Selectmen have agreed to pay the summer water and sewer bill over the minimum.

Brian Brown was to be told to stop Mr. Salmon's property and tell him to stop all building on his property as he does not have a permit. Water Pollution & Control erred when they approve the ceptic system on his property. He has made vast changes on the intent of the property and may have to go to the BOA for approval.
