

Selectmen's Meeting, June 19, 1989

Present: Edwin F. Rowehl, Chairman, William Suydam, Madeleine Henley, Administrative Assistant and Elizabeth Shaw, Secretary.

Greg Reinert met to discuss a project he will work on for the Selectmen. Information from the inventory forms will be archived on the computer. This information will be used in projecting various town statistics, i.e. future school enrollments, etc. Greg took the R-Base books to work with.

Mr. Hennesey came in to speak about the continuing problem with the Grant/Holt property on Pleasant St. The condition of the property has been a concern since 1969. Some effort has been made to clean up the property after selectmen schedule a court appearance, back in 1984 or 85. Mr. Hennesey has been in touch with solid waste and water pollution control. He wants to see the property cleaned up and kept clean to meet the zoning regulations. Since the zoning officer has completed his inspection, Mr. Suydam sees the next step being taking the owner to court and hope the courts act favorably for the town. Mr. Hennesey will contact the Governor if nothing can be done by the selectmen. He sees this as an enviromental problem. Madeleine assured Mr. Hennesey that he would be kept ~~u~~dated on progress made at the property, vis-a-vis her communications with various state officials.. *up*

Lloyd Henderson was in today and Madeleine let him know she would be checking the Hyland property. she did so and reports that it appears one or two vehicles were moved and some material has been sorted. Although one door has been covered, another door has been left opened. The court ordered compliance has not been met.

Madeleine brought the selectmen up to date with the actions being taken by the attorneys on behalf of the town.

Meeting adjourned 9:30
