

Selectmen's Meeting, Monday, December 13, 1993

Present: Phil Dwight, Chairman, Dave Boule', Tom Davis and Betty Shaw, Secretary.

Meeting called to order at 7:00PM.

Mike Beauchamp, Fire Chief, Bob Bethel, Assistant Chief, Neil, Matt Rabideau and Dick Edmunds requested job guidelines for a fireman who developed a seizure problem this past year which resulted in his being inactive for several months. Although under control and seizure free for over four months, the firemen want to know if the man can be a line officer and what is his capacity to be on the department?

At a meeting of the fire dept last week, the man was reappointed to his former position on the department. Bob Bethel asked what the legal ramifications of having the man on the department will be.

Phil pointed out that the logical position to take is to have the doctor's statement as to what the man can and can not do.

The man has contacted his doctor to request a doctors' clearance, as requested by the fire department at the last meeting.

Until he receives the clearance his duties will be limited.

He did go on an accident call, (car roll over), the other night but did not do the driving. Upon arrival at the scene, he directed traffic and no one asked that he leave the scene.

Selectmen stated that until he receives the clearance, he can do nothing physical, climb ladders, or drive etc. Phil sees no problem with attendance at meetings and doing limited duties.

Dave believes if he keeps to what his doctor says, there should be no problems. Selectmen believe he can be a member and officer on the department while waiting for the doctors' clearance. The doctor will be asked to specify what duties he can and cannot do.

Dave moved to accept the minutes of 12/06. Second, Tom. All in favor. So move.

DRA sales assessment was signed, as well as bill of sale for fire truck, supplemental warrant for taxes and abatement on the Brown sewer tax lien.

Pat Maynard gave a report on activities at the gym. Due to the lack of cleanliness of the bathrooms, Pat cleaned them. She requested information on who is responsible for cleaning and how often. Repairs to the gym have begun and new locks will be installed. Keys have been stamped and can not be duplicated. Selectmen pointed out the need to have private groups produce their own certificate of insurance.

Pat finds the job is taking more time than she had counted on. She would like to cut her hours in half and knows some people who will be putting in applications for the position.

Mr. & Mrs. Mazola reviewed their assessment with the Selectmen. They question the assessment on the lake front portion of lot which has the power lines running through it. This is not a building lot, although there is some value as access to the lake. After some discussion the selectmen agreed to reduce the lot value to \$6,000.

Phil produced a proposed budget for all departments. The highway budget was reduced from what was presented by the road agent to what was budgeted last year. The increase in the total budget is the result of the debt for the land closure and the increase in worker's comp.

After viewing the Whitney property, the Selectmen agreed to change the grade factor to E which reduced the building value from \$27,000 to \$12,830.

The were be no meeting on the 27th of December.

Meeting adjourned 9:25
