Re: Determination of Negligible Impact for removal of three trees

Dear Conservation Committee:

I request a Determination of Negligible Impact for the removal of three trees, consisting of two dead Ash trees each approximately 14" in diameter, and one 8" diameter Eastern Red Cedar tree that is in decline. The Ash trees are close to the edge of the lawn and pose a potential hazard from falling branches. The Cedar tree is close to utility lines serving the house. The trees would be professionally removed by a bucket truck or tree climber. The stumps will be cut flush or ground in place, but will not be excavated.

Thank you for your consideration of our request.

Best Regards,

Timothy and Kimberly Nguyen
