BOT

Planters : 12 at \$688 = \$8256
Garbage Bins: 8 @ \$828 = \$6624
Recycle Bin(Paper one side Comingle other side) : 4 @ \$1338 = \$5352
Total = \$20, 232 plus shipping
(Shipping was \$250 for one so say \$4000 for 12)

They make triple units – Trash,paper, comingle: 8 @ \$1418 = \$11,584 (same price as 8 single trash and 4 recycle)

\$25,000 total

Couple of things:

- 1) Paper must be separate from Comingle(bottles and cans)
- 2) Half as many recycle bins as trash bins in your request.
- 3) The trash receptacle looks exactly like the paper receptacle (minus the word "paper" engraved)
- 4) Three (3) different trucks pick up – Trash,paper and comingle - Cannot be mixed or picked up in one truck
- 5) Comingle and paper only picked up once a week on Wednesdays- No addt staff for added pick ups if needed.

"I can guarantee that trash gets mixed in with the recyclables and we will then have to throw it all in the trash to avoid fines from Westchester County. Tried this before NG"

How to setup. ?

Please see the following link for the vests that meet the latest NIJ standard and are eligible for BVP reimbursement.

Ballistic Vests: <https://www.nij.gov/nij/topics/technology/body-armor/compliant-ballistic-armor.htm>

Stab Vests: <https://www.nij.gov/nij/topics/technology/body-armor/compliant-stab-armor.htm>

REMINDER: BVP funds may be used for tactical-level armor. However, only one vest may be purchased per officer in a replacement cycle. If an agency purchases a tactical-level vest for an officer, it must be his or her primary vest. Jurisdictions cannot then use BVP funds to purchase a regular-duty vest for the same officer during the same replacement cycle.

Notice: Justice Assistance Grant (JAG) funds may not be used to pay for that portion of the bulletproof vest (50%) that is not covered by BVP funds. JAG funds may be used to purchase vests for an agency, but they may not be used as the 50% match for BVP purposes.

NOW, THEREFORE, BE IT RESOLVED by the Board of Trustees of the Village of Briarcliff Manor, County of Westchester, State of New York, as follows:

Section 1. There is hereby authorized to be issued serial bonds of the Village in the aggregate principal amount of up to \$520,000, pursuant to the Local Finance Law, in order to finance the additional costs of the Project.

Section 2. It is hereby determined that the Project is a specific object or purpose, or of a class of object or purpose, described in subdivision 19(c) of paragraph a of Section 11.00 of the Local Finance Law and that the period of probable usefulness of the Project is fifteen (15) years. Section 3. The Board of Trustees of the Village has ascertained and hereby states that (a) the revised estimated maximum cost of the Project is \$1,632,628; (b) the Board of Trustees of the Village plans to finance the costs of the Project from (i) the proceeds of the serial bonds or bond anticipation notes issued in anticipation of such serial bonds authorized in the aforementioned bond resolutions adopted on October 26, 2016 and March __, 2018 and (ii) the proceeds of the serial bonds authorized herein or bond anticipation notes issued in anticipation of such serial bonds; (c) the maturity of the obligations authorized herein may be in excess of five (5) years; and (d) on or before the expenditure of moneys to pay for any additional costs of the Project for which proceeds of such obligations are to be applied to reimburse the Village, the Board of Trustees of the Village took "official action" for federal income tax purposes to authorize capital financing of such item.

Section 4. Subject to the terms and conditions of this bond resolution and the Local Finance Law, including the provisions of Sections 21.00, 30.00, 50.00 and 56.00 to 60.00, inclusive, the power to authorize the serial bonds authorized herein, and bond anticipation notes in anticipation of the issuance of such serial bonds, including renewals thereof, the power to prescribe the terms, form and contents of such serial bonds and such bond anticipation notes, and the power to issue, sell and deliver such serial bonds and such bond anticipation notes, are hereby delegated to the Village Treasurer, as the chief fiscal officer of the Village. Section 7. Prior to the issuance of the obligations authorized herein, the Board of Trustees of the Village shall comply with all applicable provisions prescribed in Article 8 of the Environmental Conservation Law, all regulations promulgated thereunder by the New York State Department of Environmental Conservation, and all applicable Federal laws and regulations in connection with environmental quality review relating to the Project (collectively, the “environmental compliance proceedings”). In order to describe and specify certain terms of the Village's continuing disclosure agreement for that purpose, and thereby to implement that agreement, including provisions for enforcement, amendment and termination, the Village Treasurer is authorized and directed to sign and deliver, in the name and on behalf of the Village, the commitment authorized by subsection 6(c) of the Rule (the "Commitment") to be placed on file with the Village Clerk, which shall constitute the continuing disclosure agreement made by the Village for the benefit of holders and beneficial owners of the obligations authorized herein in accordance with the Rule, with any changes or amendments that are not inconsistent with this bond resolution and not substantially adverse to the Village and that are approved by the Village Treasurer on behalf of the Village, all of which shall be conclusively evidenced by the signing of the Commitment or amendments thereto. The agreement formed collectively by this paragraph and the Commitment, shall be the Village's continuing disclosure agreement for purposes of the Rule, and its performance shall be subject to the availability of funds and their annual appropriation to meet costs the Village would be required to incur to perform thereunder. The Village Treasurer is further authorized and directed to establish procedures in order to ensure compliance by the Village with its continuing disclosure agreement, including the timely provision of information and notices. Prior to making any filing in accordance with the agreement or providing notice of the occurrence of any material event, the Village Treasurer shall consult with, as

7. AUTHORIZE VILLAGE MANAGER TO EXECUTE A PROFESSIONAL SERVICES AGREEMENT WITH RGR LANDSCAPE ARCHITECTURE A SCHEMATIC DESIGN PROPOSAL FOR THE YOUTH CENTER

BE IT RESOLVED that the Village Manager is hereby authorized and directed to execute on behalf of the Village a Professional Services Agreement with RGR Landscape Architecture to prepare a Schematic Design Proposal for the Youth Center as per their proposal of \$38,000 with a \$5,000 contingency for a total of \$43,000 to be charged to budget code A1010.490.

Mr. Henry Jamin, Superintendent
Briarcliff Manor Recreation Department
3 Library Road
Briarcliff Manor, New York 10510

Re: Briarcliff Manor Youth Center
Schematic Design Proposal - Revised

(+) 5,000 Contingency

Dear Mr. Jamin:

As requested, following is our revised proposal for schematic design of a new youth center on the site of the current youth center behind Village Hall. The new total fee is \$38,000.00. This fee includes \$13,000.00 for the work of consulting engineers and estimators which we feel is necessary for the proper completion of the schematic design phase of the project and remains unchanged from the previous proposal. The balance (\$25,000.00) is a fee that we feel will basically cover our costs and is a reduction of nine thousand dollars. We are willing to perform the tasks outlined below, but cannot perform any additional work and cannot cover the costs of additional work of the sub-consultants without additional compensation. We, of course, will not proceed with additional work without prior approval by the Village.

Based on our initial meeting, we understand that you are looking to retain architectural and Engineering consultants to assist you in reviewing the conditions of the existing building, developing a comprehensive building program, identifying potential concept design alternatives to accommodate the program, and creating a schematic design from the preferred concept plan. In addition, you would like a schematic level cost estimate for the final schematic design. Following is a detailed scope of work, a summary of the design team, and a fee proposal.

1.0 Project Understanding

We understand that the Youth Center operates programs from a converted ranch house that was moved to the site in the 1990s. The structure was installed on a new foundation, creating a basement that provides a large, open, finished space with at grade access. The upper level (the house) consists of several fairly small rooms that are not conducive to carrying out the program uses of the Youth Center. These rooms also do not help meet the stated need for additional recreation program spaces that would better serve a wider range of Village residents and interests. The structure is adjacent to an existing exterior basketball court that is in good condition and is well used, and the building and court are adjacent to a large open grass field surrounded by wetlands.

2.0 Project Parameters

We have included as part of our proposal the services of a structural engineer, MEP engineers, civil engineers, and cost estimators to assist with the preparation of the schematic design. We will endeavor to make all new construction, as well as site design, as sustainable as possible.

We will ask you to identify a group of users/ stake holders that can work with us through the schematic design process. This group will be invited to attend a series of workshops in which we will gather information, and later, present alternatives for discussion. The goal is to work through the process and reach consensus on the final schematic design. The budget for the construction work is undetermined at this time and therefore this proposal is for planning, concept design, schematic design and schematic level cost estimating only.

3.0 Scope of Services

The scope of work included in the proposal includes the following tasks:

Task 1: Existing Conditions Analysis and Program Development

- Code analysis - review code requirements for building type and proposed building use;
- Site visit - inventory of existing conditions, verify existing foundation footprint and;
- Base drawings - create a set of existing conditions drawings to use as the base for our design work. Note: The Village shall supply survey information indicating the location of the existing building, the existing exterior basketball court, the adjacent field and wetland boundaries, existing utilities, and adjacent roads and existing parking;
- Workshop with client representatives to establish project goals, set priorities, refine the building program, and develop an overall vision that will guide the conceptual design effort.

Task 2: Concept Design

- Identification of options and development of conceptual alternatives for the various building program elements;
- Meeting with consultant team to review structural, MEP, and regulatory issues;
- Workshop with client representatives to review and evaluate conceptual alternatives; select the preferred alternative;
- Preparation of final conceptual design; civil, structural and MEP analysis and recommendations.

Task 3: Preparation of Final Schematic Design

- Preparation of a final schematic design with associated civil, structural, mechanical, electrical and plumbing components;
- Preparation of a site plan rendering, a perspective rendering of the proposed building as well as building plans and elevations as required to describe the design;
- Preparation of a schematic level cost estimate.

Additional Services:

- Changes to documents previously approved by the client or as required by unknown conditions will be considered additional services and will be undertaken only with prior written approval of the client;

Assumptions:

- Any surveys that are required to document the current existing conditions shall be the responsibility of the Owner.

4.0 Project Team

Our proposed project team includes key RGR staff members to provide architectural design services as well as several outside consultants who we believe will be essential to the design effort for this project.
