Subject: electric power supply RFP - bid evaluation details
Attachments: Muni RFP proxy template - Final.docx
Importance: High

Hello all,

As you all know, bid evaluation day for the power supply RFP is coming up on the Tuesday, February 25th. All participating entities will need to have someone with the authority to execute the power supply contract present, or they will need to fill out, sign, and return the attached proxy letter, preferably scanned and emailed or faxed. **Please confirm whether you'll be signing the proxy letter or attending in person.** If someone will attend in person, please let us know who that will be.

A few more details on the evaluation: The meeting will start at 1pm in the Innovation Room in the Open Cape/Cape Cod Commission Building (directions and a map are available [here](#)). A consultant retained by the Compact will review the bid prices, and compare them to current forward electricity prices. The Compact's legal counsel will discuss contract modifications proposed by bid respondents. The RFP asked respondents to provide 1, 2, 3, and 4 year fixed-price options. Attendees will have until 5:00pm to decide which, if any, bid to accept.

Please feel free to give me a call with any questions. And, thanks to all that have reviewed electric account numbers. It's not glamorous work, but it's crucial for this contract!

-Stephan
