Honorable Selectman,

I am asking to have an issue entered upon the agenda for your Tues 6/16 meeting at 7:30 -

My concern is for the safety of officers and/or traffic guards and drivers when in late winter and early spring the work is done on the sides of island roads.

At that time trees are bare and many fresh colored Beech tree leaves make it difficult to tell if driver is to "come" or "stop". I feel the officers or guards should wear gloves. I will go - with your OK - to Ocean State Job Lot and buy a carton of gloves - color to be decided - if need be. The expense cannot be that major.

As has been stated repeatedly
in the local papers and discussed
in many venues on island, there is
an aging demographic element on
island. Such a fact means more
cataracts, macular degeneration,
slower reaction time etc - etc -
There are potentially increased
hazards ahead.

(I'd have to see officers, guards,
drivers and/or the crews
and equipment! - huh!

Sincerely,

Happy Sponberg
