Dear Selectmen,

My husband and I met with Warren today to go over some of the proposed changes and ideas that you discussed this past Monday on your annual walk around Menemsha.

We would like to make a couple of requests/suggestions after the meeting.

(1) If the VTA bus stop is moved to the other side of the street, by the bathrooms, we ask that the stop be located where the wooden walkway starts. Besides being convenient for people going to the beach, it may help cut down on the VTA noise for us.

(2) In the past, the berms for the parking on the southeast side of the bathroom parking lot have always been in line with the southeast corner of the building. This year the berms were moved past the building and we would like them to go back where they were, so they don't protrude past the building.

(3) Suggest that we limit the number of cars in the satellite parking area. It is our understanding that there may have been a max of 30 cars on any given day this summer. Considering how overwhelmed Menemsha was with people, it seems to make sense not to ever get to the maximum that that satellite parking can hold.

Going forward, please add me to your email list when notifying interested parties about meetings concerning Menemsha.

Thank you.

Barbara Armstrong
