

# Massachusetts Clean Vessel Act

## Administered by the Division of Marine Fisheries

Funding for the Massachusetts Clean Vessel Act (MA-CVA) is provided through the Federal U.S. Fish and Wildlife Service's Sportfish Restoration Program. Each year the Massachusetts Division of Marine Fisheries (*Marine Fisheries*) applies for this Federal funding to help support clean water and the No Discharge Zone that includes all of Massachusetts coastal waters. This program encourages the use of pumpouts by making the service free and easily accessible. This funding is critical to our clean water initiative which supports our vast natural resources.

*Marine Fisheries* administers the awarded grant funds according to recreational boater demand, pumpout history, and the programmatic needs of each municipality or facility. Awarded funds are estimated based on available funds and are subject to change based on emergency equipment needs and/or increased programmatic needs. Funds are used to install, operate, and/or maintain the pumpout equipment listed in the chart below.
