

NEWS ADVISORY

CAPE LIGHT COMPACT PRESS CONFERENCE

What: Announcement of Cape Light Compact Going 100% Renewable and Pricing for Next Term

When: Wednesday December 7, 2016 at 1:00 p.m.

Where: OpenCape Building/Barnstable County Complex

It's not every day that a municipal aggregator is able to provide 100% renewable electricity and support future renewable energy projects, all while staying competitively priced.

Cape Light Compact will be announcing that its aggregation power supply program will be matching its customers' electricity usage 100% with renewable energy certificates, and how this will be accomplished. The Compact will also be supporting future renewable energy projects in New England and North America. This will provide an easy way for Cape Cod and Martha's Vineyard electric customers to address climate change through Cape Light Compact's power supply program.

The Compact will also announce the residential electricity supply prices, which will start with customers' January meter reads.

There will be representatives from the Compact, the Cape Cod Climate Change Collaborative and a representative from the Compact's supplier that will be speaking at the press conference and available for any questions that members of the media may have.

Additional press materials will be available at the press conference.
