Hi Tim, I am writing in support of the work The Field Fund, Inc is planning to do on the fields here in Chilmark. It seems that their efforts will improve the playing conditions for our students and for the community, at no additional cost to the school. The Chilmark School welcomes the basic maintenance support this fall (aeration, overseeding) from The Field Fund, Inc, and understands that this maintenance is supplemental, (mowing not included) , and will not interfere with the use of the fields by the students or community members. I did meet and speak with the members of The Field Fund last week when their turf grass expert, Jerad Minnick, came by to assess the field. I am grateful that they are offering to help rejuvenate the Chilmark playing field. If you have any questions, or concerns please contact me.
