Hello,

I am working on a three-minute film for Volvo Sweden. We will be filming lifestyle shots of the car and a couple who are touring Massachusetts. We will be filming approximately 5 – 6 days starting the 7th or 8th of September starting first in Boston, then coming to the Cape & Vineyard. The director and clients are interested in doing some lifestyle and around Menemsha Basin and Creek.

This would consist of us parking the car somewhere close to the water, and having the talent near the car or possibly talent looking at the water with the car in the background. We will be there probably 2 – 3 hours all told. I do not have a schedule yet, but it looks like it would be sometime between 9/10 – 9/13 (Monday – Thursday). We will be about 12 - 15 in crew, clients and talent. We will be using small LED lights with battery packs and will stay out of the way of tourists & business deliveries.

Please let me know if there are any permit fees, or if you would recommend a police detail or anything else. The production company carries full liability insurance and will add the Town of Chilmark as an additional insured. If you have any questions or concerns, you may reach me via email or cell phone (both below).

Thank you in advance for your consideration.

Best,
Karen Stark
