Re: Mussel Grant

To the Honorable Selectmen of Chilmark,

At the time of my acquisition of the mussel grant located on the north shore, the entire system was sunk and unmarked. It was a mess. I have vested much time & \$ to get it back in shape. I actually supplied the seed & helped the previous operator to get the system operating.

The currents at its' location make it difficult to capture spat. It is also a very strenuous project to operate & cannot be worked during the strongest currents. It is clearly marked and functioning at this time. I would like to continue maintaining it and would like to speak with the boards (shellfish, fish, selectmen) about expanding to other species.

Respectfully Submitted,

Stanley Larsen
