

**Technical Research Group
Meeting Minutes
November 30, 2010**

Members in attendance: David Cressman, Roger Tougas, Roger Race, Lara Stone and David Hickox

Members absent: Arthur Larrivee

Others in attendance: Bridget Earle, Roxanne O'Connell and Thomas Kirby

Mr. Cressman began the meeting by explaining that in a November 15, 2010 e-mail, Mr. Kirby requested a meeting of the TRG to discuss a four month extension of his MET tower to provide him with twelve months of data. Mr. Kirby explained this will give him twelve months of data which he will share with the Town. In response to a question from Ms. Stone, Mr. Kirby explained that USDA who will be his creditor requires twelve months of data and there is a significant change in the density of air between now and March. After some further discussion noting that there is presently no information regarding the proposed location and height of the proposed wind turbine, it was noted that this information has not been furnished and will occur only when a formal application is submitted. Mr. Tougas then made a motion to grant the four month extension, Ms. Stone seconded the motion which was unanimously adopted.
