An on-site emergency meeting was held to review the proposed exterior changes to the property at 165 Main Street. The emergency meeting was necessary due to the desire of the new owner to open the renovated restaurant on March 15th. The contractor for the project would be away after February 21st and would be unable to meet with the Design Advisory Board until after February 28th.

No plans were submitted at the meeting but the design intent was explained and material samples were presented to the attending board members by the contractor, the new restaurant owner and the property manager. The Board will have an informal recommendation to P & Z within the next few days.
