

Town of Dunstable - Refurbishment of the monument area:

Using the flag pole as the center, a 16 foot radius circle with straight base will be the basis of the design. The design will incorporate a 2 step concept. Step 1 will be on either side of the Rev War monument. The step up will consist of granite curb set at the same height as the base of the RW monument. The second step up will be approximately 16-20 inches prior to the flag pole and in line with the end of the open monument planting area on either side. This step will also be made of granite curb that matches step 1. The outer perimeter will be constructed of large cobble stones interfacing with the granite steps. The inner pre perimeter will also be made of the same cobble stones and the approximate diameter from the flag pole will be 7.5-8 ft. This concept will allow sloping in the bricked area. Brick to be a solid red and granite to be gray so as to coincide with the facing of the town hall. Work to be completed by May 22, 2013.
