#### I. Floats

Don Beers and Jake Emerson provided background on the floats in the harbor. Don thinks the aquaculture floats work great and is not sure how or why the float issue arose in the first place. It was suggested that, in the future, the DBMC only field complaints from the public that come in written form. The members agreed that this is a good policy.

#### II. Aquaculture Management Plan

The members of the aquaculture plan subcommittee are very busy at this time of year and as soon as things calm down, the plan will get back on track. John Carnuccio said that he would like to have a likely production date for the draft plan. John Brawley stated that a plan will get to the selectmen by the end of 2007.

#### IV. Miscellaneous

The Cordage Park marina is still in the MEPA process and is a long way off from the public comment period, which is why the DBMC has not heard anything about it. The DBMC would like Don Beers to return at some point and discuss the harbor dredging that is scheduled to take place soon.

There being no further business, the meeting was adjourned at 7:30 pm.

Respectfully submitted,

Corey Wisneski  
Secretary
