Enfield Conservation Meeting  
RE: Silt in Crystal Lake

Present: Shirley Green, Sue Hagerman, Ed Rippe, Tim Simple, Alan Strickland, Jeff Wells,

10:00 AM Meeting began at 54 Hawley Drive. Observed the silt delta at the mouth of an unnamed brook. Then the group proceeded uphill following the brook. Evidence of a lot of silt deposits when the water was slowed by logs or brush. Observed several stream bank slides into the brook as a result of bank undercutting. After reaching Boys Camp Rd., the group returned to 54 Hawley Dr., where the group drove to observe Oak Hill Rd. drainage patterns. Also stopped on Lockhaven Rd. to view a culvert between Boys Camp and Oak Hill Rd.

Situation will be discussed at next meeting, possibly talking with town manger and Ken Daniels.

Meeting terminated at 11:25 AM.
