

# Town Conservation Land Naming Proposal

The Open Space Implementation Sub-Committee proposes that certain town-owned parcels be renamed. The intention is to avoid having these properties known by the name of their previous owner. An exception might be land that is donated to the town. We believe the proposed names more accurately reflect the status of these parcels.

We want to start using these names from this day forward, making sure they appear that way in/on things like the forest management plan and open space maps.
