

Appendix 7

Comprehensive Planning: A Manual for Maine Communities ¹

Table of Contents

Introduction xi

Part A: Getting Started

Chapter One: Getting Organized 1

- Appoint the Local Planning Committee 1
- Membership 1
- Committee chairperson 2
- Ground rules for committee meetings and decisions 2
- Timetable 3
- Organize Available Resources 3
- The basic tools 3
- Three Important Sources of Information 5

Chapter Two: Public Participation 7

- Guidelines 8
- On Planning Your Participation Effort 11
- References 13

Chapter Three: Contents of a Comprehensive Plan 15

- The Inventories and Analyses 15
- Where do you start? 15
- A method of land use planning 15
- The required inventories and how they are c-o-n-n-e-c-t-e-d 16
- What's included in an inventory? 18
- How much time and effort should be spent on inventory and analysis? 19
- Policies 19
- What is a policy? 19
- When should the committee start writing policies? 21
- Beware of silence (I) 21
- Future Land Use Map 22
- Implementation Strategies 22
- In general 22
- Beware of silence (II) 23
- Capital investment plan 23
- Regional coordination 23

References **24**

Part B: The Planning Elements 25

Chapter Four: Topography, Soils and Water 27

State Goal and Legislative Requirement **27**

Inventory and Analysis **28**

Topography: Inventory **28**

Topography: Analysis **31**

Surficial geology and soils: Inventory **32**

Surficial geology and soils: Analysis **33**

Water resources: Inventory **35**

Water resources: Analysis **39**

Issues and Implications **40**

Policies **42**

Implementation Strategies **42**

Storm water runoff and erosion control **42**

Phosphorus control **43**

Groundwater protection **43**

Best practices in resource-based industries **43**

Land acquisition **44**

Regional organization **44**

References **44**

Chapter Five: Habitats and Other Critical Natural Resources 45

State Goal and Legislative Requirement **45**

Habitats and Critical Natural Resources **46**

Inventory and Analysis **46**

Wetlands **47**

Important wildlife habitat **48**

Important plant habitat **50**

Other unique natural areas **50**

Beginning with habitat **51**

Sand dunes **53**

Shoreland areas **53**

Issues and Implications Concerning Habitats and Critical Natural Resources **54**

Policies Concerning Habitats and Critical Natural Resources **55**

Implementation Strategies for Habitats and Critical Natural Resources **55**

Scenic Resources **57**

Inventory and Analysis of Scenic Resources **57**

Issues and Implications Concerning Scenic Resources **58**

Policies to Protect Scenic Resources **59**

Implementation Strategies to Protect Scenic Resources **59**

References **60**

Chapter Six: Hazard Mitigation 61

State Goal and Legislative Requirement **61**

Inventory and Analysis **63**

Floods and coastal storms **63**

Hurricanes and severe winds, coastal erosion, ice storms, forest **65**

fires, droughts, dam failures, earthquakes and other hazards

Issues and Implications **67**
Policies **67**
Implementation Strategies **69**
Prevention **70**
Property protection/retrofitting **72**
Natural resource protection **72**
Emergency services **73**
Public information **73**
Structural projects **73**
A next step **73**
References **74**

Chapter Seven: Historic and Archaeological Resources 75

State Goal and Legislative Requirement **75**
Inventory and Analysis **77**
Issues and Implications **79**
Policies **80**
Implementation Strategies **80**
References **82**

Chapter Eight: Agriculture and Forestry 83

State Goal and Legislative Requirement **83**
Inventory and Analysis **86**
Agricultural, commercial forestry and related activities **86**
Related activities **88**
Ownership patterns **88**
Resource base **89**
Analyze how land use trends may be affecting farm and **90**
forest operations
Identify specific trends affecting viability of existing operations **90**
in the short and long term.
Issues and Implications **91**
Policies **92**
Implementation Strategies **92**
Protect the resource **92**
Enhance economic ability **93**
Protect the right to farm/manage woodlands **94**
Encourage markets **94**
References **95**

Chapter Nine: Marine Resources 97

State Goal and Legislative Requirement **97**
Inventory and Analysis **99**
Port, harbor and natural resources **100**
The working waterfront **102**
Residential growth and development **104**
Scenic quality and water access **104**
Issues and Implications **105**
Policies **106**
Implementation Strategies **108**
Marine resources/water quality **108**

Harbor land use **108**
Harbor management **108**
Access **109**
References **110**

Chapter Ten: The Economy 111

State Goal and Legislative Requirement **111**
Inventory and Analysis **113**
The regional economic base **114**
The local economy **115**
Issues and Implications **116**
Policies **116**
Implementation Strategies **117**
References **118**

Chapter Eleven: Population and Demographics 119

State Goal and Legislative Requirement **119**
Inventory and Analysis **121**
Identifying the region **121**
Current year estimates of population and households **122**
Describing the characteristics of the population **122**
Trend analysis **123**
Projecting populations and households **124**
Commuter population **125**
Seasonal population **125**
Issues and Implications **126**
Policies **127**
Implementation strategies **127**

Chapter Twelve: Land Use Patterns 129

State Goal and Legislative Requirement **129**
Inventory and Analysis **130**
Land use map **131**
Analysis **132**
Issues and Implications **134**
Policies **136**
Implementation Strategies **137**
Directing development away from rural areas **137**
Land use regulatory tools **137**
Capital investment tools **139**
Land acquisition tools **139**
Taxation tools **140**
Directing development toward growth areas **140**
Land use regulatory tools **140**
Capital investment tools **141**
Land acquisition tools **141**
Taxation tools **142**
References **144**

Chapter Thirteen: Housing 145

State Goal and Legislative Requirement **145**

- Inventory and Analysis **147**
- Conducting the inventory and analysis of housing stock **147**
- Conducting the inventory and analysis of housing affordability **149**
- Conducting the inventory and analysis of affordable housing **149**
- General review **149**
- A more detailed analysis **153**
- Summary of the analysis of affordability **155**
- Lack of choice in the local market **157**
- Regional considerations **157**
- Issues and Implications **157**
- Policies **158**
- Regulatory approaches **158**
- Production approaches **159**
- Regional approach **159**
- Implementation Strategies **159**
- References **160**

Chapter Fourteen: Transportation 161

- State Goal and Legislative Requirement **161**
- Inventory and Analysis **163**
- The road system **163**
- Parking **166**
- Public transit, intercity travel, and ride sharing **167**
- Bicycling, sidewalks, and pedestrian paths **167**
- Major tourist terminals **168**
- How the community sees its highways **168**
- Issues and Implications **168**
- Policies **170**
- Implementation Strategies **172**
- References **175**

Chapter Fifteen: Recreation and Open Space 177

- State Goal and Legislative Requirement **177**
- Inventory and Analysis **179**
- Municipal parks and recreation **179**
- Other outdoor recreation and open space **180**
- Public access to water bodies **181**
- Connection and proximity **182**
- Issues and Implications **182**
- Policies **183**
- Municipal parks and recreation **184**
- Other outdoor recreation and open space **184**
- Public access to water bodies **184**
- Implementation Strategies **185**
- Planning and creating a system of open spaces **185**
- Acquisition strategies **185**
- Property taxation strategies **186**
- Land use regulation strategies **186**
- References **187**

Chapter Sixteen: Public Facilities and Services 189

State Goal and Legislative Requirement **189**
Inventory and Analysis **190**
Public sewer, water supply, drainage, and solid waste **190**
management systems
Municipal line departments **193**
Schools **194**
Other public services **194**
Issues and Implications **195**
Policies **196**
Implementation Strategies **196**
References **198**

Chapter Seventeen: Government and Fiscal Capacity 199

State Goal and Legislative Requirement **199**
Inventory and Analysis **200**
Assessed value **201**
Operating expenditures and revenues **202**
Borrowing capacity **203**
Alternative revenue sources **203**
Issues and Implications **203**
Implementation Strategies **204**
Capital investment plan **204**
References **207**

Part C: Future Land Use Plan 209

Chapter Eighteen: Future Land Use Plan 211

Step 1: Prepare a Land Use Sectors Map **212**
Step 2: Prepare a “Rural” and “Growth” Areas Map **212**
Growth areas **212**
Rural areas **213**
Step 3: Prepare the Future Land Use Map **215**
Sample Maps **218**

Chapter Nineteen: Regional Approaches 221

Provisions in Law **222**
Multi-town Land Use Planning Approaches **223**
Multi-town Finance and Development Approaches **224**
Multi-town Land Use Regulatory Approaches **225**
Looking to the Future **226**
