

FREMONT ENERGY COMMITTEE

TOWN OF FREMONT, NH

November 17, 2015

Attendees

Gene Cordes, Cindy Crane, and Cheryl Rowell

- Welcome Everyone – the meeting was recorded for Channel 22
- Minutes were reviewed and accepted.
- Reminder that two weeks from tonight will be the Town Holiday Party at the library.
- The Committee has been asked to review the Master Plan Energy Chapter and suggest edits. Members will do this over the next couple of weeks and list comments, and share with the rest of the members.
- Gene will follow up with Jack Ruderman on a solar install at the Municipal Garage/Landfill site. Jack may need the copies of the electric bills.
- Discussion about adding info to the website on PV projects for homeowners and info about municipal projects. It appears at present that there are more federal incentives at this time for solar electricity than solar hot water projects. The pv projects have about an 8-12 year payback.
- Not sure what has happened to the net metering legislation so this is also something we need look into.

Meeting was adjourned at 7:37 PM.

Next meeting is on January 17th at 7 PM, Fremont Town Hall
