Also present: Project Engineer Dennis Quintal, Cons Com Chair Bill Knee, and Cons Com Member Leanne Miner

Site walk for Mr. Galloway who seeks a variance from Article IX Section E to allow drainage features like detention basins, grass swales, wet ponds, and berms within the wetland setback on Shirkin Road [Map 5 Lot 35]

At 9:30 am, the group walked Mr. Galloway's property as Mr. Quintal pointed out the features on the site plan map such as the 100-foot set back markers to the wetlands, where the drainage swales, retention ponds and fire pond would be, etc.

Mr. Andrew had to leave at 10:15 am for a prior engagement, but the group was still walking the property when he left. The site walk ended at approximately 11:00 am.

Respectfully Submitted,

Doug Andrew
ZBA Chair
