

Approved: 14 September 2016

Hanover Conservation Committee Minutes for Wednesday, June 8, 2016

Present: Ed Chamberlain, John Trummell, Bill Mlacak, Jim Kennedy, Whit Spaulding, Vicki Smith

Septic Replacement Project, 246 Hanover Center Road

Present: Chris Leister (Hogg Hill)

Reviewed septic system replacement project and removal of old discharge pipe which currently discharges directly into the brook

The septic replacement project was unanimously recommended

26 River Rd. bank stabilization project

Present: Scott Williams (Pathways Consulting), Bruce Swomley (property owner)

Stabilization project with revised smaller scope approved unanimously

In order to protect the river bank:

- Construction to rely predominantly on hand work vs wheeled/ tracked vehicles

- Stabilize existing footpath with timber crib steps and/or waterbars

- Add the linear feet of impact along the river to Wetland & Buffer Impact

Summary Table

- Build dock anchor system to withstand high velocity current during high volume dam releases

- Wanner Earth Moving to be contractor of record

- Project be continuously monitored by a qualified professional during construction

- Commission strongly recommended that storm water run-off from the house be directed away from the slope below the house.

May HCC minutes and site visit minutes approved.
