

CONSERVATION COMMISSION
July 11, 2016 at 4:00 PM
104 Blueberry Hill Road

In attendance:

Members: Peter Christie, James Kennedy, Ed Chamberlain

Staff: Vicki Smith

Others: Chris Leister and Jacob, Septic Designers; Katrina Bogan, Landowner

Chris Leister showed the area of the existing septic system and that of the proposed system. The site is constrained by wetlands on both sides of the lot. Last fall, the area between the wetlands was logged, stumped and graded. The Commission would like to see the disturbed area smoothed, seeded and mulched, possibly with a level spreader or other BMP installed to slow storm water discharge and treat water before it enters the wetland. Silt fence should be installed at the top of the bank until the ground is stable and re-vegetated. A more permanent seed variety should be used in the disturbed area.

Chris will modify the plan and submit it prior to the Commission meeting on Wednesday.

ADJOURNMENT: The meeting adjourned at 4:05 PM.

Respectfully Submitted,

Vicki Smith, Scribe
