

Harvard Sewer Commission  
March 19, 2012

9:00 AM

Commissioners: Cindy Russo, Kyle Hedrick, Rick Maiore

Approved minutes of 3/12/2012

A discussion of the diagnostic/service protocol to be developed in the event of a user system failure.

The discussion focused on three areas:

- What to do in the event of a mechanical or pump type failure
- What to do in the event of a power failure
- How to define drain layer/general contractor failure/warranty responsibility

Kyle Hedrick moved : The licensed drain layer for the purpose of connecting to the sewer district will be assumed to be and assume the responsibilities of a general contractor.

The vote 3 - 0

The commission concluded that it must establish a working relationship with W & S prior to the sewer district becoming operational. To this end the commission will schedule our next meeting for 8AM on 3/28 when W&S personnel will be available after a already scheduled 7:30 AM sewer construction meeting.

Action items: Cindy contact Ira Grossman on status/issues of the two new church fellowships halls.

Rick: Generate and vet the 2009 property owner list to include # of bedrooms and house square footage.

Kyle: confirm with W&S

Rick Maiore
