

Re: Paper work**From** frank_benesh@roadrunner.com**To:** [John Terry](#)**Date:** April 20, 2013 9:46:57 AM

Your application is not complete.

I don't find a drawing that clearly shows how much of the existing structure (both footprint and in elevation) is currently in the proscribed setback.

I don't find a drawing that clearly shows how much of additional structure will incrementally be in the proscribed setback, both footprint and elevation.

The entire application package has not been provided in electronic form, preferably PDF. It should be emailed to me at frank_benesh@alum.mit.edu

There is not a abutter list on labels, as requested.

This has tentatively been scheduled for a public hearing on May 15th, assuming you can provide the missing information within the next week.

Hi Frank, I stopped by the town hall wednesday, and hand delivered a packet for you . Ella told me she would put it your mail box. I put everything I had inside referencing the checklist you sent me. Also, a check for 75 dollars . Could fire off an email back to me just letting me know you got it? Thank you again for your assistance on this matter.
