

## **Lee Energy Committee Meeting Minutes February 26, 2018**

Present: Sharon Meeker, Barbara Wauchope, Mary Woodward and Lou Grondin

Guests:

The committee agreed that the Voter Information Guide warrant explanations for the March 13 vote are sufficiently comprehensive and that no further education actions seem necessary. Information about the energy warrants has been submitted to the Lee Town Crier and Lee Community Newsletter. Lou has now gathered several bids on improved lighting for the PSC & Transfer station, including bids that assess rebate eligibility for high- vs low-use lighting, and including a bid that Toby obtained for the Transfer Station. Lou will summarize the two most comprehensive and competitive lighting bids for presentation to the Trustees of the Trust Fund and will contact Revision related to assembling the lighting bid in the designated spreadsheet format for easy rebate calculation. Lou will also contact Revision to arrange for keeping the solar panel bid in effect. Mary will confirm with Professor Michael Mooiman to be the energy speaker (on New Hampshire's energy mix/plan/future/competitiveness with other New England states) for the next education event. Sharon will contact John Tappan about a possible meeting date to present the lighting bid information.
