

Lee Energy Committee Meeting Minutes

October 3, 2017

Lee Safety Complex

Present: Jana, Laurel, Mary, Sharon

The meeting began with acceptance of Jana as the lead person on the project with the New Hampshire Energy Cooperative (NHEC). She explained the project carefully and stressed that the town would gain close to \$10,000 in rebates if the town chooses to select the NHEC project. Jana will call the electricians who would apply for the job of purchasing and replacing the fluorescent lights in the Public Safety Building (PSB) and the Recycling Center (RC) with LED lights. (Fluorescent lights last only about 7 – 10 years and LEDs may last as much as 25 years, there would be a 50% savings just on the purchase of LED's. Also, some of the fluorescents are near replacement time.) Jana is in contact with two electricians and we are awaiting their application for the job. She will also coordinate with Bill Stevens and Toby VanAyck and with Julie Glover. She has conducted a "walk through" for Steve, the Affinity representative and has also set up one with Burt Sutcliffe, an electrician from Ecoelectric. Sharon and Mary accompanied Burt Sutcliffe on his "walk-through" of the two buildings. ; Burt inserted an LED in the stairwell of the PSB so that people can compare the LED light quality with that of the dimmer fluorescents.
