

## **Litchfield Recycling Committee Minutes**

November 8, 2017 called to Order 4:07pm

Attendance: N. Boccio, G. Geci, L. Losee, D. Raap, D. Wilson

Minutes of September 27<sup>th</sup> meeting were approved.

### **STATUS OF RECYCLING BUILDING AND RELATED PROJECTS**

Naomi stated that the recycling center has hydraulic covers to protect new roll-offs from inclement weather. In addition, she has supplied maps to engineering company for wall rebuilding at center. The workers have to be careful not to puncture cap with new signs or walls. A new truck was purchased so that Litchfield can haul its own recycled material soon.

There is some concern about what to do with old fire & smoke detectors and fire extinguishers left at the recycling center: very expensive to discard at \$10 each. The public should know that most of these items can be returned to stores. Propane tanks can be recycled at the center for \$5.00 each. Naomi is working on organizing center so that it is more inviting and user friendly.

### **TRASH/RECYCLING CONTAINERS IN TOWN**

L. Losee shared that the HDC likes the trash/recycling containers that the town of Kent, CT, is using. Discussion continued about who would make the containers and if there is a DEEP grant to help pay for. G. Geci will look for art student to draw depiction of trash/recycling containers so that it can be approved by HDC and the Borough of Litchfield.

Meeting Adjourned: 5pm

Next Meeting: February 21, 2017

Denise Raap, Secretary
