

FMAC minutes from meeting of March 30, 2011

- 1) VM to adv if IMA's went out to Harrison, Scarsdale and Rockland Stormwater District 1 to use their MenziMuckers
- 2) The VM was to reach to the County again regarding the wing wall at the Anita Lane/Valley Terrace Bridge. Was this done? Rich to Contact Mike Poly at the County.
- 3) Craig volunteered to be the liaison to the April 30 Clean up day.
- 4) We discussed the sewage backup issues in Harbor Heights and Rich advised that they were looking into sending video cameras through the sewer lines to see if there are blockages. I have also heard that the Village DPW cleaned out the local sewer lines which has also helped.
- 5) Rich updated the group about the ongoing issue of too much bacteria found at the Confluence of the Mamk and Sheldrake rivers, by Metro North and by I 95. Rich was going to e mail Metro North to see if anything can be done about tainted runoff from the rail lines.
- 6) We discussed the silt re build up by the N Barry Extension bridge. Rich explained that this is occurring because of an eddy which is by the bend and causes the back up.
- 7) Leigh had asked if there was a way to "fix/fill in" the eroded portion of the riverbank by Warren Park. Rich advised if this was done, the water would not be able to recede back into the river.
- 8) Stonybrook stone removal-We were told this would be done when the river was "low enough". Dan speaks regularly with Keith Calcagni and will adv when the stones can be removed.
- 9) Paul Ryan volunteered to represent us on the All Hazard Mitigation Plan Committee
