Sustainability – New buildings constructed in the Commercial I district after the passage of this bylaw are encouraged to promote sustainability by being environmentally responsible and resource-efficient throughout a building's life-cycle from siting to design, construction, operation, maintenance, renovation and deconstruction. This may be accomplished by incorporating sustainable materials in the construction (e.g., reused, recycled-content, or made from renewable resources); create healthy indoor environments with minimum pollutants (e.g., reduced product emissions); and/or feature landscaping that reduces water usage (e.g., by using native plants that survive without extra watering). The criteria in the current Leadership in Energy and Environmental Design (LEED), Institute for Sustainable Infrastructure (ISI), and EPA's Green Building program offer examples of measures that will help accomplish this goal.
