Meeting call to order at 10:00 A.M. by Chairman Armand White

Office up-dates: There were no office updates

Vouchers to be signed: There were no vouchers signed

Health Agent Report: There was no report

Old Business:

Discussion was held regarding Wheelabrator using groundwater to cool their ash. In February, Brown and Caldwell, representing Wheelabrator, requested a letter from the Board of Health for approval to do this. The Board was not aware Wheelabrator has been using groundwater for this purpose. The Board asked DEP for their recommendation. It first has to be established there is no drinking water in the area and no contaminates in the groundwater. It was recommended Wheelabrator put in writing their intentions for valid use of groundwater, meet standard testing for contaminates and maintain the same standard over four quarters. Wheelabrator is currently in violation of the site assignment. Once The Board is aware of their intentions and additional

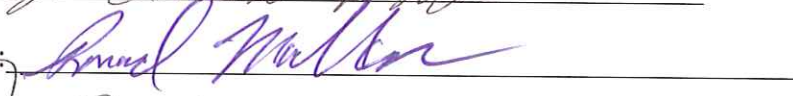

testing is done and adequate, the Board could consider a remediation and have that incorporated into the site assignment with the assistance of Town Council.

The Board is investigating all aspects relating to the groundwater being used. It is their intent to invite Wheelabrator or their representative to the next Board meeting, June 11th, 2014. They will review all information from them and DEP to move forward with a determination.

Meeting adjourned at 11:00 A.M.

All Business Not Reasonably Anticipated To Be Discussed:
