# Town of Millis <br> Fields Committee Presentation 

Finance Committee Meeting
Wednesday, May 7, 2014

## Locations considered

- Village Street land - Deed issue would not work.
- Dyer Street - designated as a "Park" cannot be used for sports.
- Dewey property - Designated as conservation land.
- Cassidy property - site of future ball fields.

## Town of Millis, Massachusetts Athletic Fields Master Plan Conceptual Project Costs and Estimate Construction Schedule

| Design Project Descriptions |  | Costs |
| :---: | :---: | :---: |
| Preliminary Design Phase for High School Improvements |  | \$63,000 |
| Clyde Brown Synthetic Turf Field - Final Design |  | \$98,000 |
| Oak Grove Farm Natural Turf Soccer Fields - Final Design without Parking |  | \$72,000 |
| Permitting |  | \$17,000 |
| Geotechnical Evaluation and Subsurface Explorations |  | \$37,000 |
| Survey (Subconsultant Cost) |  | \$19,500 |
| Preliminary Design Project Cost |  | \$306,500 |
| Conceptual Construction Costs ${ }^{(1)}$ | Schedule ${ }^{(4)}$ | Cost |
| Clyde Brown Synthetic Turf Soccer Field | 2015 | \$1,200,000 |
| New High School Baseball Field | 2016 | \$780,000 |
| New High School Synthetic Turf Stadium Field | 2017 | \$3,270,000 |
| Oak Grove Natural Turf Soccer Fields | 2018 | \$800,000 |
| Parking for Oak Grove Soccer Complex (150 parking spaces) | 2018 | \$575,000 |
| Irrigation Well for Oak Grove Soccer Fields | 2018 | \$90,000 |
| New Cassidy Property Little League Baseball Fields ${ }^{(2)}$ | 2020 | \$250,000 |
| New Oak Grove Farm/Cassidy Property Walking Path (8-foot wide paved) ${ }^{(3)}$ | 2020 | \$100,000/mile |
| New Oak Grove Farm/Cassidy Property Walking Path (8-foot wide crushed stone) ${ }^{(3)}$ | 2020 | \$65,000/mile |
| Total Master Plan Construction Costs without Walking Path |  | \$6,965,000 |

## Notes:

(1) Conceptual project cost are current (April 2014) including 15 percent for contingencies. Costs do not include design fees.
(2) Project construction costs are for one Little League baseball field. The number of fields will be determined during design.
(3) Construction costs is for one mile of walking path. The length and location of proposed walking path will be determined during design.
(4) Estimated construction completion date.

## Thoughts

- It is more cost efficient to design the Clyde Brown synthetic multi-purpose field and Oak Grove Farm Commission natural turf soccer fields this fall as a combined, single project.
- Savings for the Town include:
- Engineering costs
- Construction management
- Mobilization of one contractor to build both fields
- Inspection costs of a single contractor
- If the Clyde Brown turf field was to be permitted in May 2014, it could be used in May / June 2015
- If permitting is delayed till November 2014, the Clyde Brown turf field could be used in September / October 2015
- If the Oak Grove 11 V 11 and 8 V 8 was to be permitted in May 2014 it could be used Spring 2016
- If permitting is delayed till November 2014, Oak Grove 11 V 11 and 8 V 8 could be used Fall 2016
- The multi-site "Survey" effort \$19,500.
- The multi-site "Geotechnical" effort \$37,000.
- The multi-site "Permitting" effort \$17,000.

Will enable the Millis Fields Committee to determine the final number and locations of the track and field complex and baseball fields, on both the High School/Town Park property and also the Cassidy property due to the proximity of the wetlands. This information will enable the consultants to finalize the total project cost, prior to the Fall Town meeting.

- Note that the consultant has provided estimated costs for all the facilities, shown.

## Q1 How often do you or your children currently visit the athletic fields in Millis?

| Answer Choices | Responses |
| :--- | :--- |
| Three or more times per week | $52.56 \%$ |
| Once per week | $\mathbf{1 8 . 4 9 \%}$ |
| One to three times per month | $9.58 \%$ |
| Less than once per month | $\mathbf{1 1 . 8 0 \%}$ |
| Never | $\mathbf{7 . 5 7 \%}$ |
| Total | $\mathbf{5 3}$ |
