Chairman Kim Dubuque called the Capital Improvements Program Committee (CIPC) Site Visit to order at 10:00 am.

The committee members toured the Transfer Station facility and inquired of the capital needs and services provided. During the tour Scott Greenwood explained the functionality and capacities of the transfer station as it currently is laid out, and some of the improvements he has made over the course of his tenure as manager of the facility.

Discussion from the committee focused mostly on the Station's loader and its life expectancy and replacement cost, the possibility of expanding the facility with a pole barn from funds already allocated to a capital reserve account, and the ongoing improvements of the facility with their contracting through Waste Management and other vendors.

The committee members expressed their thanks to Mr. Greenwood and Mr. Kinmond and commented on how well they thought the facility was being run.

The Site Visit was ended at 11:04 am.

Respectfully Submitted,

Daniel Merhalski, Town Planner
