

## New Durham Multi-Hazards Mitigation Plan 2010

### First Meeting

August 5, 2010 at 3 pm

Present at this initial Hazard Mitigation meeting were: Marcia Berry (Custodian NDS), Terry Jarvis, Catherine Orlowicz (Town Historian), Ken Quigley (EMD), Kyle Pimental, and Michelle Auen.

Kyle explained the evolution of the Multi-Hazard Mitigation planning and the steps necessary to complete the process. Using a full-color Geographic Information (GIS) map prepared by Kyle, the Town's boundaries, 100-year flood zone, and development that has occurred over the last six years were identified and discussed.

A packet of information was provided for each attendee that included: the agenda, the Town of New Durham, Background for All Hazard Mitigation Policies and Implementation, and the new format for the Multi-Hazard Mitigation Plan for New Durham.

The team went through the updated Hazard Mitigation Plan for suggestions, edits, and formatting. The team provided a list of road name changes for the Town which include: Ridge Road formerly Ridge Road Top, Gertrude Lane formerly Drew Circle, Grove Road formerly Pine Grove Development, Tash Road formerly Old Route 11, Squam Road formerly Un-named portion of Nipmuck, Downing Road formerly Shore Drive, Brightwaters Drive formerly Cedergren Road West, Berry Road formerly Ridge Road, and Saint Moritz Road formerly St. Moritz Road. The team also filled in missing data on the Statistics of Interest table. The team identified a list of past disasters since 2000 including: the Mothers Day flood 2006 Disaster number 1643, April Floods 2007 Disaster number 1695, Tornado in July 2008 Disaster number 1782 NH, Ice Storm December 2008 Disaster number 1812 NH, and Wind/ Rain Storm February 2010 Disaster number 1892 NH.

The team also went over Chapter 3 and identified new Hazards. The team collaboratively ranked the hazards using past data reoccurrence. The team also updated new potential hazards in the Multi-Hazard Threat Analysis to include hazardous spills, extended power failure, and public health threats. The top five threats will be included in the updated plan including new threats. In the new plan it was agreed that Chapter 3 would include the three new hazards addressed at the meeting.

The team was asked to provide input on the past and future development trends on the Tax parcel map.

The homework for the next meeting is gathering historic data and Town history. The team is also going to collect information regarding culvert replacements from the past 5 years.

The next meeting was set to follow August 12<sup>th</sup> at 5 pm.
