Town of Northborough

Earthwork Board
63 Main Street, Northborough, MA 01532
Conference Room B
Wednesday, November 30, 2016

Present: Janet Sandstrom, Anthony Ziton and Tony Pini

Also Present: Fred Litchfield, Town Engineer; Jim Almonte and Wayne Kimball.

At 7:00 pm, Ms. Sandstrom called to order the Earthwork Board meeting.

Public Hearings:

Renewal Permit
Kimball Sand and Gravel
200 Southwest Cutoff
Map 106, Parcels 2, 3, 5, 19 and 20

Mr. Almonte with Waterman Design introduced himself and his client Wayne Kimball with Kimball Sand. Mr. Almonte explained the plan submitted is an updated plan of the property at 200 Southwest Cutoff. The elevation at RT 20 in front of the site is 334 and the Wegmans site is elevation 435. The goal for the Kimball property is to make the majority of the site to be at elevation 332. Which includes moving the conveyor system and the scale house. The existing driveway onto Route 20 will move approximately 100 to the north if approval is granted by Mass DOT.

Mr. Kimball explained that moving the conveyor system to a lower point helps control dust and it is more economical to take material from a higher location and process at a lower elevation.

Mr. Ziton asked how long before the site would be complete. Mr. Kimball estimated it would be another 5 to 7 years to be completed.

Mr. Pini moved to issue a renewal permit with same bond amount of \$47,000 and the motion was unanimously approved.

Other Business:

- The Board agreed to approve the Minutes of October 26, 2016 as written.
- The next meeting date is scheduled for December 28, 2016 if necessary.

Adjourn:

Board members agreed that no further business needed to be discussed.

Mr. Ziton motioned, Mr. Pini seconded, and it was unanimously voted, "To adjourn the Earthwork Board meeting."

The Earthwork Board meeting ended at 7:45 pm.

Respectfully submitted,

Fred Litchfield
Town Engineer
