

PLANNING
COMMISSION

Nov 17, 2004

To Saybrook Planning Commission,
EXHIBIT # 78

I have the following concerns about
the proposed development, "The Preserve".

1. The land set aside as open space is too intermingled with the golf course. Shouldn't open space be uninterrupted by golf fairways and greens?
2. Water. This area already suffers in low rain/snow fall years. The golf course will surely use too much water.
3. With all of the clearing + blasting that will be needed to complete this new area of town, I am concerned about the aquifer collapsing. Then we would really have water problems. Who would pay for the new wells to be drilled.
4. The noise in my pleasant, peaceful neighborhood. 10 years of trucks, pneumatic nailers, earthmovers, chainsaws, and the rest of equipment needed to install roads, build houses,

4 cont, - level the greens to complete this
high development,

5. This is a bad idea for using a
valuable natural property.

6. Please strongly consider not
allowing this to go through
in our town.

Thank you for all the
time and effort the
committee puts
into this proposal.
