TOWN OF OLD SAYBROOK

Land Use Department

302 Main Street • Old Saybrook, Connecticut 06475-1741 Telephone (860) 395-3131 • FAX (860) 395-1216

Application Form Municipal Coastal Site Plan Review

Section I: Applicant Identification

Applicant:			Date:	
Address:			Phone:	
Project Address or Loc	cation:			
Interest in Property:	fee simple	option	lessee	easement
	other (specify):			
Primary Contact, if oth	er than Applicant: ₋			
Address:			Phone:	
City/Town:		State:	Zip Code: _	
Electronic Mail:				
Section II: Project Site	e Plans			
Please provide project information, and indicate	•	•		the following
Project location				
Existing and propos	ed conditions, inclu	ıding buildings	s and grading	
Coastal resources o	n and contiguous t	o the site		
High tide line [as de contours (for parcels				
Soil erosion and sec	diment controls			
Stormwater treatme	nt practices			
Ownership and type	of use on adjacen	t properties		
Reference datum (i.	Reference datum (i.e. National Geodetic Vertical Datum, Mean Sea Level, etc.)			evel etc)

Section III: Written Project Information

Please identify the application triggering this Coastal Site Plan Review:
Site Plan for Zoning Compliance
Subdivision or Resubdivision
Special Permit or Special Exception
Variance
Municipal Project (CGS Section 8-24)

Part I: Site Information

Street Address or Geographical Description:		
City or Town:		
Waterfront site (includes tidal wetlands frontage)?	YES	NO
Name of on-site, adjacent or downstream coastal, tidal or na	vigable wate	rs:
Identify and describe the existing land use on and adjacen any existing structures, municipal zoning classification, sign project site:		
Indicate the area of the project site:	sq. feet	acres
Indicate whether the project or activity will disturb 5 acres of land area (please also see Part II.B. regarding propositions):		
Project or activity will disturb 5 or more total acres of land may be eligible for registration for a (DEP) General Permit Stormwater and Dewatering Wastewaters Associated with C	t for the Disc	charge of
Project or activity will not disturb 5 or more total acres of la	ind area.	

Part II. A.: Proposed Project or Activity

Describe the proposed project or activity including its purpose and relate activities such as site clearing, grading, demolition, and other sirpreparations; percentage of increase or decrease in impervious cover over existing conditions resulting from the project; phasing, timing and method proposed construction; and new uses and changes from existing uses (attacked) additional pages if necessary):
Part II. B.: Proposed Stormwater Best Management Practices
Describe the stormwater best management practices that will be utilized ensure that the volume of runoff generated by the first inch of rainfall retained on-site, especially if the site or stormwater discharge is adjacent tidal wetlands. If runoff cannot be retained on-site, describe the site limitation that prevent such retention and identify how stormwater will be treated before it is discharged from the site. Also demonstrate that the loadings of tot suspended solids from the site will be reduced by 80 percent on an average annual basis, and that post-development stormwater runoff rates and volume will not exceed pre-development runoff rates and volumes (attach addition pages if necessary):

Part III: Identification of Coastal Resources and Coastal Resource Policies

Identify the coastal resources and associated policies that apply to the project by placing a check mark in the appropriate box(es) in the following table.

Coastal Resources	On- site	Adjacent	Off-site, but within influence of project	Not Applicable
General Coastal Resources* Definition: CGS §22a-93(7); Policy: CGS §22a-92(a)(2)	Х	x	X	
Beaches & Dunes Definition: CGS §22a-93(7)(C); Policies: CGS §22a-92-(b)(2)(C) and 22a-92(c)(1)(K)				
Bluffs & Escarpments Definition: CGS §22a-93(7)(A); Policy: CGS §22a-92(b)(2)(A)				
Coastal Hazard Area Definition: CGS §22a-93(7)(H); Policies: CGS §§22a-92(a)(2), 22a-92(a)(5), 22a-92(b)(2)(F), 22a-92(b)(2)(J), and 22a-92(c)(2)(B)				
Coastal Waters, Estuarine Embayments, Nearshore Waters, Offshore Waters Definition: CGS §§22a-93(5), 22a-93(7)(G), and 22a-93(7)(K), and 22a-93(7)(L) respectively; Policies: CGS §§22a-92(a)(2) and 22a-92(c)(2)(A)				
Developed Shorefront Definition: CGS §22a-93(7)(I); Policy: CGS §22a-92(b)(2)(G)				
Inland Wetlands & Watercourses Definition: CGS §22a-93(7)(F); Policy: CGS §22a-92(a)(2)				

Coastal Resources	On- site	Adjacent	Off-site, but within influence of project	Not Applicable
Intertidal Flats Definition: CGS §22a-93(7)(D); Policies: CGS§22a-92(b)(2)(D) and 22a-92(c)(1)(K)				
Islands Definition: CGS §22a-93(7)(J); Policy: CGS §22a-92(b)(2)(H)				
Rocky Shorefront Definition: CGS §22a-93(7)(B); Policy: CGS §22a-92(b)(2)(B)				
Shellfish Concentration Areas Definition: CGS §22a-93(7)(N); Policy: CGS §22a-92(c)(1)(I)				
Shorelands Definition: CGS §22a-93(7)(M); Policy: CGS §22a-92(b)(2)(I)				
Tidal Wetlands Definition: CGS §22a-93(7)(E); Policies: CGS §§22a-92(a)(2), 22a-92(b)(2)(E), and 22a- 92(c)(1)(B)				

^{*} General Coastal Resource policy is applicable to all proposed activities

Part IV: Consistency with Applicable Coastal Resource Policies and Standards

Describe the location and condition of the coastal resources identified in Part III above and explain how the proposed project or activity is consistent with all of the applicable coastal resource policies and standards; also see adverse impacts assessment in Part VII. A below (attach additional pages if necessary):

Part V: Identification of Applicable Coastal Use and Activity Policies & Standards

Identify all coastal policies and standards in or referenced by CGS Section 22a-92 applicable to the proposed project or activity:

General Development* - CGS §§22a-92(a)(1), 22a-92(a)(2), and 22a-92(a)(9)

Water-Dependent Uses** - CGS §§22a-92(a)(3) and 22a-92(b)(1)(A); Definition CGS §22a-93(16)

Ports and Harbors - CGS §22a-92(b)(1)(C)

Coastal Structures and Filling - CGS §22a-92(b)(1)(D)

Dredging and Navigation - CGS §§22a-92(c)(1)(C) and 22a-92(c)(1)(D)

Boating - CGS §22a-92(b)(1)(G)

Fisheries - CGS §22a-92(c)(1)(I)

Coastal Recreation & Access - CGS §§22a-92(a)(6), 22a-92(C)(1)(j) and 22a-92(c)(1)(K)

Sewer and Water Lines - CGS §22a-92(b)(1)(B)

Fuel, Chemicals and Hazardous Materials - CGS §§22a-92(b)(1)(C), 22a-92(b)(1)(E) and 22a-92(c)(1)(A)

Transportation - CGS \S 22a-92(b)(1)(F), 22a-92(c)(1)(F), 22a-92(c)(1)(G), and 22a-92(c)(1)(H)

Solid Waste - CGS §22a-92(a)(2)

Dams, Dikes and Reservoirs - CGS §22a-92(a)(2)

Cultural Resources - CGS §22a-92(b)(1)(J)

Open Space and Agricultural Lands - CGS §22a-92(a)(2)

^{*} General Development policies are applicable to all proposed activities

^{**} Water-dependent Use policies are applicable to all activities proposed at waterfront sites, including those with tidal wetlands frontage.

Part VI: Consistency with Applicable Coastal Use Policies and Standards

Explain how the proposed activity or use is consistent with all of the applicable coastal use and activity policies and standards identified in Part V. For projects proposed at waterfront sites (including those with tidal wetlands frontage), particular emphasis should be placed on the evaluation of the project's consistency with the water-dependent use policies and standards contained in CGS Sections 22a-92(a)(3) and 22a-92(b)(1)(A) -- also see adverse impacts assessment in Part VII.B below (attach additional pages if necessary):

Part VII. A.: Identification of Potential Adverse Impacts on Coastal Resources

Identify the adverse impact categories below that apply to the proposed project or activity. The applicable column **must** be checked if the proposed activity has the **potential** to generate any adverse impacts as defined in CGS Section 22a-93(15). If an adverse impact may result from the proposed project or activity, please use Part VIII to describe what project design features may be used to eliminate, minimize, or mitigate the potential for adverse impacts.

Potential Adverse Impacts on Coastal Resources	Applicable	Not Applicable
Degrading tidal wetlands, beaches and dunes, rocky shorefronts, and bluffs and escarpments through significant alteration of their natural characteristics or functions - CGS §22a-93(15)(H)		
Increasing the hazard of coastal flooding through significant alteration of shoreline configurations or bathymetry, particularly within high velocity flood zones - CGS §22a-93(15)(E)		
Degrading existing circulation patterns of coastal water through the significant alteration of patterns of tidal exchange or flushing rates, freshwater input, or existing basin characteristics and channel contours - CGS §22a-93(15)(B)		
Degrading natural or existing drainage patterns through the significant alteration of groundwater flow and recharge and volume of runoff - CGS §22a-93(15)(D)		

Potential Adverse Impacts on Coastal Resources	Applicable	Not Applicable
Degrading natural erosion patterns through the significant alteration of littoral transport of sediments in terms of deposition or source reduction - CGS §22a-93(15)(C)		
Degrading visual quality through significant alteration of the natural features of vistas and view points - CGS §22a-93(15)(F)		
Degrading water quality through the significant introduction into either coastal waters or groundwater supplies of suspended solids, nutrients, toxics, heavy metals or pathogens, or through the significant alteration of temperature, pH, dissolved oxygen or salinity - CGS Section 22a-93(15)(A)		
Degrading or destroying essential wildlife, finfish, or shellfish habitat through significant alteration of the composition, migration patterns, distribution, breeding or other population characteristics of the natural species or significant alterations of the natural components of the habitat - CGS Section 22a-93(15)(G)		

Part VII. B.: Identification of Potential Adverse Impacts on Future Waterdependent Development

Identify the adverse impact categories below that apply to the proposed project or activity. The applicable column **must** be checked if the proposed activity has the **potential** to generate any adverse impacts as defined in CGS Section 22a-93(17). If an adverse impact may result from the proposed project or activity, use Part VIII to describe what project design features may be used to eliminate, minimize, or mitigate the potential for adverse impacts.

Potential Adverse Impacts on Future Water-dependent Development	Applicable	Not Applicable
Locating a non-water-dependent use at a site physically suited for or planned for location of a water-dependent use - CGS §22a-93(17)		
Replacing an existing water-dependent use with a non-water-dependent use - CGS §22a-93(17)		
Siting a non-water-dependent use which would substantially reduce or inhibit existing public access to marine or tidal waters - CGS §22a-93(17)		

Part VII. C.: Identification of existing or proposed Water-dependent Uses

Describe the features or characteristics of the proposed activity or project that qualify as water-dependent uses as defined in CGS Section 22a-93(16). If general public access to coastal waters is provided, please identify the legal mechanisms used to ensure public access in perpetuity, and describe any provisions for parking or other access to the site and proposed amenities associated with the access (e.g., boardwalk, benches, trash receptacles, interpretative signage, etc.)*:

^{*} If there are no water-dependent use components, describe how the project site is not appropriate for the development of a water-dependent use.

Part VIII: Mitigation of Potential Adverse Impacts

Explain how all potential adverse impacts on coastal resources and/or future water- dependent development opportunities and activities identified in Part VII have been avoided, eliminated, or minimized (attach additional pages if necessary):
Part IX: Remaining Adverse Impacts
Explain why any remaining adverse impacts resulting from the proposed activity or use have not been mitigated and why the project as proposed is consistent with the Connecticut Coastal Management Act (attach additional pages if necessary):
