

**PRINCETON CENTER  
MINUTES – NOVEMBER 15, 2007**

Present: Gaile Rollins, Louise Dix, Carl Lapoint, Terry Thompson

Gaile reported to the committee she had seen Michael Ivas. He has a new job which prevents him taking part on this committee.

Gaile also reported it cost \$839.00 for Graves Company to come and replace the fire extinguishers.

Even though the lock box has been installed, Ken Whitney is still requesting a key for it. He seems to feel the Princeton Center is responsible for this key.

All of the problems with the boiler seem to have been taken care of but the furnace is still on manual. The auto settings are not working. Carl says the electrical system should be checked. All of the problems we are having seem to stem from the cleaning of the boiler. Rust in the pipes is clogging up the valves.

Bill is still working on the handicap ramp. There is rust to be cleaned off and digs and gouges from the skateboarders that are being repaired.

There are still three tenants who need insurance certificates for their rental units.

Louise asked about the amount in the center's revolving account since we are coming up into the most expensive time of the year.

Gaile reported to the group that painting and raking of the entire back of the building was done by the prisoners. They also trimmed back all of the trees and bushes. A good job!

Carl was asked to be the liason person for the boiler if there are any problems. He will also work on a letter to the town about looking into the costs of a new heating system for the center.
