Part III: Work Description

Indicate which of the following information has been provided (on a plan, in narrative description or calculations) to clearly, completely and accurately describe work proposed within each of the resource areas checked in Part I, item 11 above.

Identifying Number/Letter (of plan, narrative or calculations) Planvir w and Cross Section of: Structures (such as buildings, piers, towers and headwalls) _ID_14_ Drainage and flood control facilities, including culverts and open channels (with inverts). N/A dams and dikes ID_1,13,14 Subsurface sewage disposal systems & underground utilities Filling, dredging and excavating, indicating volume and composition of material N/A N/A Compensatory storage areas, where required in accordance with Part III. Section 10:57 (4) of the regulations N/A Wildlife habitat restoration or replication areas N/A Other Point Source Discharge N/A Description of characteristics of discharge from point source (both closed and open channel), when point of discharge falls within resource area checked under Part I, item 1.1 above, as supported by standard engineering calculations, data and plans, including

but not limited to the following:

- 1. Defineation of the drainage area contributing to the point of discharge:
- 2. Pre- and post-development peak run-off from the drainage area, at the point of discharge, for at least the 10-year and 100-year frequency storm:
- 3. Pre- and post-development rate of infiltration contributing to the resource area checked under Part I, item 11 above:
- 4. Estimated water quality characteristics of pre- and post-development run-off at the point of discharge.

Part IV: Mitigating Measures

- 1. Clearly, completely and accurately describe, with reference to supporting plans and calculations where necessary:
 - (a) All measures and designs proposed to meet the performance standards set forth under each resource area specified in Part III of the regulations; or
 - (b) why the presumptions set forth under each resource area specified in Part II or Part III of the regulations do not apply.

- 2. Clearly, completely and accurately describe, with reference to supporting plans and calculations where necessary:
 - (a) all measures and designs to regulate work within the Buffer Zone so as to ensure that said work does not alter an area specified in Part I, Section 10.02(1) (a) of these regulations; or
 - (b) If work in the Buffer Zone will alter such an area, all measures and designs proposed to meet the performance standards established for the adjacent resource area specified in Part II or Part III of these regulations.

Coastal Resource Area Type Boroered By 100-Foot Discretionary Zone: Bordering Vegetated Wetland 310 CMR 10.55	laentifying number or letter of support documents
It is proposed to construct a single family home and associated utilities on the subject lot. No work of any kind will occur in the resource area. Approximately 890 square feet of 100 foot buffer zone will be impacted as a result of this proposal. Disturbances include excavation and approximately 28 square feet of a concrete foundation. Haybale erosion control will be installed as indicated to protect the wetland from any possible damage.	ID 1, 14

Part V: Additional Information for a Department of the Army Permit No.	filling is proposed.
1. COE Application No	rmit is not required.
(to be provided by COE) (Na	ame of waterway)
3. Names and addresses of property owners adjoining your property:	
See Certified List of Direct Abutters (ID 11)	
 Document other project alternatives (i.e., other locations and/or constituted that would eliminate the discharge of dredged or fill material into waters 	
	81
5. 8½" x 11" drawings in planview and cross-section, showing the reso ity within the resource area. Drawings must be to scale and should be	
ny within the resource area. Drawings must be to scale and should be to	clear enough for photocopying.
Certification is required from the Division of Water Pollution Control be issued. Certification may be obtained by contacting the Division of Water	
Boston, Massachusetts 02108.	
Where the activity will take place within the area under the Massachus	setts approved Coastal Zone
Management Program, the applicant certifies that his proposed activity of	omplies with and will be conducted
in a manner that is consistent with the approved program.	
Information provided will be used in evaluating the application for a pe	rmit and is made a matter of public
record through issuance of a public notice. Disclosure of this information information is not provided, the application cannot be processed nor c	an a permit be issued.
I hereby certify under the pains and penalties of perjury that the foregoing	Notice of Intent and accompanying
plans, documents and supporting data are true and complete, to the best of	of my knowledge.
