12. Is the wetland resource area to be altered by the proposed work located on the most recent Estimated Habitat Map (if any) of rare, "state-listed" vertebrate and invertebrate animal species occurrences provided to the conservation commission by the Natural Heritage and Endangered Species Program?

YES [] NO [X] Date NO MAP AVAILABLE []	printed on the Estimated Habitat Map issued October 1987
--	---

If yes, have you completed an Appendix A and a Notice of Intent and filed them, along with supporting documentation with the Natural Heritage and Endangered Species Program by certified mail or hand delivery, so that the Program shall have received Appendix A prior to the filing of this Notice of Intent?

YES [] NO []

Part II: Site Description

Indicate which of the following information has been provided (on a plan, in narrative description or calculations) to clearly, completely and accurately describe existing site conditions.

Identifying Number/Letter (of plan, narrative or calculations)

Of Calculations,	
Exhibit	Natural Features:
N/A	Soils
A	Vegetation
A	Topography
N/A	Open water bodies (including ponds and lakes)
N/A	Flowing water bodies (including streams and rivers)
A	Public and private surface water and ground water supplies on or within 100 feet of site
N/A	Maximum annual ground water elevations with dates and location of test
A	Boundaries of resource areas checked under Part I, item 11 above
N/A	Other
	Man-made Features:
A	Structures (such as buildings, piers, towers and headwalls)
N/A	Drainage and flood control facilities at the site and immediately off the site, including
	culverts and open channels (with inverts), dams and dikes
A	Subsurface sewage disposal systems
N/A	Underground utilities
A	Roadways and parking areas
Δ	Property boundaries, easements and rights-of-way
N/A	Other
	- Cirio

Part III: Work Description

Indicate which of the following information has been provided (on a plan, in narrative description or calculations) to clearly, completely and accurately describe work proposed within each of the resource areas checked in Part I, item 11 above.

Identifying Number/Letter (of plan, narrative or calculations) Planvir w and Cross Section of: Structures (such as buildings, piers, towers and headwalls) Α Drainage and flood control facilities, including culverts and open channels (with inverts), N/A dams and dikes Subsurface sewage disposal systems & underground utilities N/A Filling, dredging and excavating, indicating volume and composition of material Compensatory storage areas, where required in accordance with Part III, Section 10:57 N/A(4) of the regulations Wildlife habitat restoration or replication areas N/A N/A Point Source Discharge Description of characteristics of discharge from point source (both closed and open N/Achannel), when point of discharge falls within resource area checked under Part I, item 11 above, as supported by standard engineering calculations, data and plans, including

but not limited to the following:

- 1. Delineation of the drainage area contributing to the point of discharge;
- 2. Pre- and post-development peak run-off from the drainage area, at the point of discharge, for at least the 10-year and 100-year frequency storm;
- 3. Pre- and post-development rate of infiltration contributing to the resource area checked under Part I, item 11 above:
- 4. Estimated water quality characteristics of pre- and post-development run-off at the point of discharge.

Part IV: Mitigating Measures

- Clearly, completely and accurately describe, with reference to supporting plans and calculations where necessary:
 - (a) All measures and designs proposed to meet the performance standards set forth under each resource area specified in Part III or Part III of the regulations; or
 - (b) why the presumptions set forth under each resource area specified in Part II or Part III of the regulations do not apply.

- 2. Clearly, completely and accurately describe, with reference to supporting plans and calculations where necessary:
 - (a) all measures and designs to regulate work within the Buffer Zone so as to ensure that said work does not alter an area specified in Part I, Section 10.02(1) (a) of these regulations; or
 - (b) if work in the Buffer Zone will alter such an area, all measures and designs proposed to meet the performance standards established for the adjacent resource area specified in Part II or Part III of these regulations.
