Pete Kane at 8

Review of the map and what a site plan should contain.

Site plan could be layered.

Review of the various maps we have and discussion of where we would have renderings.

Pete Kane – National Grid would help us do a charrette. May have design elements. They wouldn't do the technical work. OK if our group goes ahead and does some design work.

Is there anything digital? Peter did digitize our stuff. He can put them in drop box and share them.

We have stamped surveys of some sections – we paid for them. Marblehead to Bradlee and Middle School to Humphrey. They aren't yet digitized. They have names of owners clearly on them.

We need SPIRIT to still do fundraising. It would be for construction.

Pete K still needs to review the survey data –he may need to clean it up.

Rts to land – town is working on that.

Site plan – RTIC will do that.

Money for construction.—That is SPIRIT but need land b/f we can get those funds most likely.

End at 8:30 p.m.
