STREETLIGHT MAINTENANCE SERVICES

1 SCOPE OF WORK:

The City of Torrington is seeking the services of a qualified street lighting repair and maintenance services contractor to provide complete field maintenance services for the City's street lighting system. The City also wishes to explore any opportunities available to reduce electricity costs and/or maintenance and improving the efficiency and effectiveness of the streetlight system.

The project scope encompasses ongoing streetlight maintenance and repair activities for 3,738 city-owned streetlight and parking lot lights as listed in Exhibit B (attached). Prospective firms must respond thoroughly to the requirements of this Request for Proposal (RFP). Prospective firms are cautioned not to make claims or statements to which they are not prepared to commit contractually.

All terms, conditions, requirements, and procedures included in this RFP must be met for a response to be acceptable. If a Proposer fails to meet any material term, condition, or requirement of procedure, its response may be deemed unresponsive and be disqualified.

The Contractor will provide streetlight maintenance services under the Base Maintenance Services portion of this Contract, and will provide streetlight replacements, new light installations, pole replacements/installations in instances when the City owns, or will own, the pole as well as the light fixture and emergency repair services. A summary listing of streetlights, detailed database of all streetlights and a map showing the streetlights covered under this contract is included in the Appendix. In the provision of the services, the Contractor shall use only luminaries, mounting brackets and accessories that meet CL&P standards and applicable codes, as approved by the Department of Public Utility Control (DPUC), or have received prior CL&P approval as equal or compatible with CL&P standards and as approved by the City.

1.1 Base Maintenance Services:

"Base Maintenance Services" include replacement of the bulb, ballast, photocell, fixture or any combination of these items for all City owned mercury, compact fluorescent, metal halide and high pressure sodium streetlights. Base Maintenance Services will also include electrical tests of the streetlight fixture for power, proper grounding, and for potential backwiring of the fixture itself. It will be the Contractor's responsibility to ensure that no electric potential exists between the fixture and the ground.

Repairs/replacements shall be made upon notification by the City to the Contractor through a work order submitted via e-mail. Lens cleaning and cleaning the fixture of any debris from insects, birds or other material is also part of the Base Maintenance Services. **Maintenance repairs shall be made within five (5) working days of notification**, weather permitting. Contractor shall notify the City via e-mail of the date and time of repairs within three (3) working days of the repair. Extreme weather conditions resulting in a local declared disaster shall be cause for extension of the five working days to make repairs.

Base Maintenance Services shall not include energy-efficient extended life streetlights with Light Emitting Diode (LED) or Induction lamps. Maintenance for these lights shall be on an as-needed basis based on cost proposals or quoted hourly costs. For cost comparison purposes it has been estimated that 500 streetlights will be replaced with energy-efficient extended life streetlights during the first two years of the contract.

The City will conduct regular streetlight operational inspections to the entire city to identify inoperative streetlights. Following the inspection, the City shall notify the Contractor of all inoperative streetlights in the system.

The Contractor shall conduct an annual street light operational inspection during the month of October. Following the operational inspection all inoperative street lights shall be repaired.

The Contractor will be expected to maintain an inventory or have available a supply/supplier of poles, photo cells, lamps, ballasts, fixtures and other equipment that is routinely used for these repairs in order to perform the contract in the timeframe required. Said inventory shall not include wood poles, except for an inventory of four (4) low-mount fiberglass poles. Base Maintenance Services shall also include re-securing decorative top fixtures to the lamppost as required.

1.2 Emergency Repair Services:

The Contractor shall be responsible for providing emergency knockdown services for City streetlights on poles that have been knocked down due to accidents, storms, or other natural disasters. During the past 5 years, the City has averaged approximately 5.6 of these instances per year. The Contractor shall provide this service on a 24-hour a day; seven-day per week basis. Initial emergency knockdown services (i.e. notification, presence at site and evaluation of services needed) shall be included as Base Maintenance Services. Prices for knockdown services, including removal of poles and any remaining section in the ground, removal of earth, rock, spoils or debris, and disposal of the same, as well as disposal of all damaged equipment will be considered Emergency Call-Out Response services, and the proposer shall provide those costs per incident in the Bid Form (Section 19). At the time the streetlight needs to be replaced, it shall be done in accordance with Subsection 1.3-Streetlight Replacement and New Installations.

The Contractor shall provide emergency telephone numbers, in addition to an emergency answering service (see Section 7, Answering Service for Emergency Calls), for reporting emergency repairs. A list of the City of Torrington's expectations, including response time, for City streetlight knockdowns are listed below:

- a. The City employee will contact the Contractor, identify the pole type, explain the extent of the damage, and inform the Contractor of the location of the knockdown. The DPW employee shall direct the Contractor as to what work is necessary to make the area safe.

- b. The Contractor shall respond to all calls from the City Public Works Department for emergency streetlight knockdowns within twelve (12) hours of the call, weather permitting. The City DPW staff will determine whether a knockdown call is an emergency or not.
- c. The Contractor shall remove the pole, including any remaining section in the ground, in accordance with the per incident costs set forth in the proposal.
- d. Any streetlight pole sections (City poles only), earth, rock, spoils or debris created from the removal of old pole and/or installation of new pole is to be removed, and disposed of properly.
- e. All useable hardware from the current pole is to be transferred to newly installed pole.
- f. Any broken glass or plastic from a broken lamp or lens is to be collected and disposed of properly.
- g. All streetlight items damaged or replaced are to be disposed of by the Contractor in accordance with Section 8, Disposal of Materials.

1.3 Streetlight Replacements and New Installations:

Streetlight replacements and new installations shall be paid on a Time-and-Material basis or Price Quote as approved and authorized by the City. The City also intends to replace streetlights with energy efficient extended life streetlights such as LED and Induction streetlights. Payment for this work shall be as provided for in this Section.

The contractor shall provide hourly costs for all necessary equipment, labor, overhead and profit to perform any of the work required by this Section. The City will use this cost data when work is authorized on a Time-and-Material basis. All materials used and invoiced to the city for Time-and-Material work shall be at actual cost without any Contractor markup and fully supported with vendor's invoices.

The contractor may also be requested to supply a price quote to the Department of Public Works to install new streetlights, streetlight poles and/or replace streetlights in Torrington. The City has the right to reject the price quote and seek quotes from other vendors to perform the work if the Director of Public Works determines that the best interests of the City would be served by seeking additional quotes. The quote shall include all coordination with the Utility. Any materials and all charges by the Utility shall be a direct pass-through to the City without markup.

The Contractor shall provide a price quote to the City within ten (10) working days of request. Installations may be fixture, a pole and fixture, or may include the mast arm, fixture and wiring at the City's discretion or any combination required. The City reserves the right to contract with other vendors for the replacement or installation of streetlights.

1.4 Utility Coordination:

The Contractor will be required to coordinate streetlight repair and maintenance activities with the Utility. In the event of a scheduling change for any reason, the Contractor will be responsible for cancellation of any utility assistance.

1.5 Streetlight Tagging:

The Contractor will be required to label any new streetlight fixture with a self-adhesive label to be affixed on the underside of the fixture as part of their streetlight maintenance responsibilities. The label shall be viewable from the ground during daylight hours and shall be provided by the Contractor and approved by the City. The Contractor shall also be required to number each new light pole owned by the City with an “*T – Number*” designation, consistent with the current numbering scheme. The number shall be assigned by the City and provided to the Contractor. The material type of the number label and method of numbering shall be consistent with the materials previously approved by the City, and the expenses of such label purchase shall be the sole responsibility of the Contractor and included in the unit cost for each installation. The Contractor shall replace any streetlight label found to be missing or illegible.

1.6 Documentation and Monthly Reporting:

The Contractor shall document all work performed on the streetlight system on a form to be provided by the City. When a repair is completed, the Contractor shall submit a completed work order via e-mail to the City within three (3) working days of the repair.

The Contractor shall submit a monthly report summarizing the work performed in the previous month. The report shall include the problems identified during the monthly inspection, repairs made, streetlights installed or removed and any other changes that affect the streetlight inventory database. This report shall be submitted concurrently with the Contractor’s monthly invoice for services.

1.7 Other Assistance:

At the City’s request, the Contractor shall make itself available to attend up to four meetings per year with city staff and/or the City Council to report on issues concerning the street lighting system, and to provide technical assistance regarding any opportunities to make improvements in the system that may yield cost savings or improved energy efficiency.

Proposals shall also include costs for providing technical assistance to the City in evaluation of electric usage and cost-savings opportunities presented by upgrading to high-efficiency street lighting.

2. QUALIFICATIONS:

Prospective firms submitting proposals shall have a minimum of three (3) years experience in the area of municipal street light maintenance services.

All individuals or companies submitting proposals are required to be registered and licensed with the State of Connecticut as an E-1 Electrical Contractor.

All proposals shall be submitted with a completed Contractors Qualification Statement AIA Document A305.

All workers employed by the Contractor shall be properly licensed, trained, certified and insured to perform installation, removal, replacement, relocation, transfer and maintenance work on street lighting equipment in close proximity to high voltage electrical conductors.

Documentation of the proper license, training, certification, and insurance in accordance with NB208 for any and all employees of the contractor that will be performing this work shall be provided as a part of the proposal submittal. Please refer to Attachment C- NE Utilities System Form NB-208.

The Contractor shall certify, in writing, that they will perform street lighting maintenance services in compliance with all applicable federal, state and local laws, regulations, safety codes and ordinances. This specifically includes drug testing for all CDL licensed drivers and copies of driver's histories for any employees who operate the vehicle in performance of services related to this scope of services.

3. TRAFFIC CONTROL:

The Contractor shall provide maintenance and protection of traffic for all operations. There shall be no separate accounting or billing for traffic control. The Contractor shall operate vehicles in such a manner so as to not impede traffic flow on city streets.

4. EQUIPMENT:

The Contractor shall provide a bucket truck with the capability of safely servicing poles up to 40 feet in height. When required, the Contractor shall supply a truck mounted auger sufficient for setting new poles. Current OSHA certifications for the boom and bucket truck shall be provided to the City prior to the start of the contract and resubmitted on an annual basis. The vehicle and crew must be capable of drilling a hole and setting wooden, metal, or fiberglass streetlight poles as may be required periodically. All equipment shall be kept clean and in good working order and repair. All vehicles used for the work of this contract shall have clearly visible on each side the name and phone number of the Contractor. Failure to maintain equipment in reliable working condition shall be grounds for declaring the Contractor in default. The Contractor shall be responsible for damage to private property arising from his operations.

5. FULL CUTOFF FIXTURES:

Any fixture that requires replacement pursuant to this contract shall be replaced with a "full-cutoff" fixture in accordance with State requirements. Before installing any full-cutoff fixtures, the Contractor will verify with the Public Works Department that the particular location is not exempt from the requirement.

6. CONTRACTOR LIAISON:

The Contractor shall designate a qualified company representative who shall be employed on a full-time basis to coordinate all work performed and act as the liaison between the Contractor and the City. This representative will be selected by the Contractor and shall be approved by the Director of Public Works, which approval shall not be unreasonably withheld.

7. ANSWERING SERVICE FOR EMERGENCY CALLS:

The Contractor shall have an answering service available to receive emergency calls from the City twenty-four (24) hours per day, seven days per week, including holidays, for the term of the contract.

8. DISPOSAL OF MATERIALS:

The Contractor shall properly manage, handle, recycle and dispose of any materials that are hazardous under federal, state, or local statute, ordinance, regulation, or agency order. The Contractor shall be deemed the “generator” for the purposes of Resource Conservation and Recovery Act (RCRA) requirements. All metal items shall be provided to the City of Torrington for recycling.

9. CODES AND STANDARDS:

The work to be performed must meet all applicable codes, whether Federal, State or local, and adhere to the standards for streetlighting equipment set forth in Connecticut Light & Power’s form NB-208, which is attached hereto and made a part hereof, and referred to as Attachment C, and as such form NB-208 may be amended in the future by DPUC.

10. PERFORMANCE BOND:

The Contractor shall furnish a Performance Bond, in a form acceptable to the City, for one hundred percent of the value of the first year’s contract. For each succeeding year of the term of this contract, the Contractor shall, on or before July 1 of each year, provide a Performance Bond for one hundred percent of the value of next year’s contract as determined in accordance with Section 13 Basis and Method of Payment. The cost of the bond shall be included in the cost for the Base Maintenance Services. For purpose of this section, the Contract Year is from July 1 to June 30.

11. INSURANCE PROVISIONS:

The Contractor shall provide the City, at its own expense, certificates of insurance for the below outlined coverages and limits. Each certificate shall require that notice be given to the City not less than thirty days prior to the cancellation or material change in the policy.

Contractor’s and Subcontractor’s Public Liability, Property Damage, Vehicle Liability and Owner’s Protective Liability Insurance shall be in the type and amounts shown below:

Contractor’s General Liability and Property Damage	\$2,000,000/\$1,000,000
Automobile Public Liability and Property Damage	\$1,000,000
Excess Liability Umbrella Form	\$5,000,000/\$5,000,000
Worker’s Compensation and Employer’s Liability	\$500,000/\$100,000
Owner’s and Contractor’s Protective Liability	\$2,000,000/\$1,000,000

All policies shall name the City of Torrington, its officers, agents, and employees as additional insureds. This provision shall be reflected on all Certificates of Insurance.

The Contractor shall indemnify, hold harmless, and exempt the city, its agents, servants, and employees from and against all legal proceedings, claims and associated costs and Attorney’s fees incident to any work done in the performance of this contract arising out of a willful or negligent act or omission of the Contractor, its agents, servants, or employees.

12. TERM:

The term of the contract shall be approximately fifty-eight (58) months , and is expected to begin on or around September 1, 2010 and ending July 31, 2015. Said period shall be automatically extended on a year-to-year basis for a total period not to exceed ten (10) years unless either party shall notify the other not later than April 1 of its intention not to so extend the Contract. The Contract Year begins on July 1 and ends on June 30th with the first contract year pro-rated based on the number of months remaining in the year upon execution of the contract.

13. BASIS AND METHOD OF CONTRACT PAYMENT:

The base contract fee for services to be performed by the Contractor pursuant to Section 1, Scope of Work, for the term of this contract shall be as follows:

Base Maintenance Services: The Base Maintenance Services shall be the annual cost on a per streetlight basis for every City owned streetlight maintained.

Emergency Repair Services: per-incident, based on costs proposed in the Schedule of Fees. Replacement and/or installations resulting from Emergency Repair Services will be paid in accordance with Section 1.3 – Streetlight Replacement and New Installations.

Streetlight Replacements and New Installations: On A Time-and Material or Cost Proposal basis as approved and authorized by the City.

The payments due the Contractor under this contract shall be adjusted monthly based on the actual number of streetlights maintained in the streetlight system.

Monthly billings shall be issued by the Contractor for service rendered pursuant to Section 1, Scope of Work.

The Contractor shall further be entitled to payments for services rendered pursuant to Section 1 Subsection 1.2, Emergency Repair Services and 1.3, Streetlight Replacements and New Installations, in accordance with the fee schedule set forth in the proposal.

Payment shall be made to the Contractor by the City within thirty (30) days of receipt of the invoice.

14. USE OF SUBCONTRACTORS:

The Contractor must identify any subcontractors that will be used on this project and describe the contractual arrangement that will exist with all subcontractors. The Contractor will be considered the prime contractor and will be fully responsible for the performance of all services, including the quality and timeliness of work performed by the subcontractor. The City must approve all subcontractors. All subcontractors must meet the Qualification requirements under Section 2 of this RFP.

15. PROPOSALS:

The City of Torrington will not be liable for any costs incurred in the preparation of the response for this RFP.

All proposal submissions and materials become property of the City and will not be returned.

Respondents to this RFP are hereby notified that all proposals submitted and information contained therein and attached thereto shall be subject to disclosure under the Freedom of Information Act.

15.1 Submission and Deadline:

All proposals must be received by **2:00 p.m., EST May 25, 2010**. Three (3) copies shall be submitted to:

Ms. Pennie Zucco
Purchasing Agent
City of Torrington
140 Main Street
Torrington, CT 06790

All proposals shall be opened publicly and recorded as received. Proposers may be present at the opening; however, there will be no public reading of Proposals. Proposals received later than time and date specified will not be considered. All proposals shall remain firm and cannot be withdrawn for a period of 120 days after receipt of proposals.

Questions about this RFP may be directed to Gerald Rollett, Public Works Director, jerryrollett@torringtonct.org, or (860) 489-2550 (fax) no later than 12 p.m. EST, May 12, 2010. All information given by the City except by written addenda shall be informal and shall not be binding upon the City nor shall it furnish a basis for legal action by any Contractor or prospective Contractor against the City.

Answers to these questions will be addressed in an addendum which will only be issued on the City of Torrington web site as per the instructions below. **It shall be the**

responsibility of the proposer to download this information. The City of Torrington will not mail a separate hard copy of addendum to proposers. No addendum will be issued less than two (2) calendar days before the scheduled proposal opening unless it is to postpone the proposal.

Specific Download Instructions:

Access the City of Torrington home page at www.torringtonct.org

Access the open bids page by clicking “Open **Bids**” in the Quick links on the bottom of the City’s Home Page.

Click on the **Streetlight Maintenance RFP** link and follow the instructions on your web browser for saving files to your hard drive.

15.2 Packaging:

Three (3) copies of the proposal shall be placed in a **sealed envelope**, bearing the name and address of the respondent and clearly marked on the envelope with the words: **“RFP #SLM-025-052510: Request for Proposals for Streetlight Maintenance Services.”**

15.3 Organization and Content of Proposal:

The RFP is intended to provide interested Proposers with uniform information concerning the conditions for submitting proposals. In response to the RFP, Proposers shall adhere to the established format. By doing so, comparable objective data will be provided for the City’s review and analysis. The Proposal shall contain the following sections, in the order and format described.

Section 1: Submittal Letter

Respondents shall submit a cover letter, addressed to Director of General Services, signed by an authorized principal or agent of the respondent, which provides an overview of the respondent’s offer, as well as, the name, title, and telephone number of the person to whom the City may direct questions concerning the proposal. The letter should also include a statement by the respondent accepting all terms and conditions contained in this RFP, signed by an officer or other individual with authority to negotiate and contractually bind the firm.

Section 2: Company Overview:

Description: Provide a description of your firm and, if applicable, associated partners and subcontractors.

History: Provide a brief history of your firm.

References: List current governmental clients and private sector clients that are relevant to this project. Include names and phone numbers of at least three (3) references that may be contacted.

Section 3: Supporting Documentation including:

Project Understanding: Provide a written discussion in sufficient detail to demonstrate an understanding of the project's scope and the services required.

Experience: Provide a detailed written summary of the Respondent's experience, qualifications, financial strength, and capability in providing similar services elsewhere, especially specific experience in providing services to municipalities.

Staff Plan: Identification of key staff who will provide any portion of the services required under the contract. For each identified individual, provide brief background and experience, and areas and levels of responsibility. Please provide resumes of all key personnel.

Service Delivery Plan: Describe how services required herein will be provided to the City, and describe how the service delivery plan will ensure timely delivery of services.

Efficiency/ Cost Saving Opportunities: Describe any opportunities available to the City to reduce electricity costs and/or maintenance needs while not impacting the efficiency and effectiveness of the streetlight system, along with any available details regarding the costs and benefits of proposed opportunities. Describe specific experience with implementing any proposed measures.

Services Expected of the City: Define the nature and scope of all services expected to be provided by the City.

Licensing Documentation: Documentation of the proper license, training, certification, and insurance in accordance with NB208 for any and all employees of the Proposer that will be performing this work

Section 4: Bid Proposal

Fees shall be submitted on the provided bid sheet.

The City of Torrington is exempt from the payment of excise taxes, transportation, and sales taxes imposed by the Federal Government and/or the State of Connecticut. Such taxes must not be included in the fixed fee.

State the annual fee for each year of services, as described in Section 13 of this RFP.

16. **PROPOSAL EVALUATION:**

16.1 **Selection Criteria:**

Proposals in response to this RFP shall be reviewed against the criteria listed below. The following criteria will be used, without limitation, in determining the successful Provider:

- a. The Respondent's technical understanding of the project, its purpose, scope and field evidenced by the quality of the proposal submitted.
- b. The background experience, and financial strength of the Respondent in providing similar services elsewhere, including the level of experience in working with municipalities and/or other governmental bodies of similar size, and the quality of services performed, either for the City or for other municipal or private sector clients.
- c. Documentation of relevant and pertinent training, licensing and accreditations of the individuals designated to provide services.
- d. The demonstrated potential to reduce the City's energy consumption and costs, while still meeting all streetlight needs, as demonstrated through specific experience and technology opportunities detailed in the proposal.
- e. Assessment of the Respondent's ability to develop and maintain a positive working relationship with City staff and actively communicate with same.
- f. Competitiveness of proposed fee, although the City is not bound to select the respondent who proposes the lowest fees for services. The City reserves the right to make such awards, including accepting a proposal although not the lowest proposed fee, as it deems in its sole discretion to be in the best interest of the City. The City reserves the right to negotiate fees and modifications to the scope of the project with the selected respondent.
- g. The Respondent's responsiveness and compliance with the RFP requirements and conditions.
- h. A review of references from other clients as provided in the Proposal submitted.

16.2 **Selection Process:**

- a. Proposals will be evaluated based upon the criteria and/or factors of evaluation listed in the Request for Proposal.

- b The City of Torrington may elect to have the proposals evaluated by a committee of two or more individuals to make a selection. If deemed necessary by the committee, the City reserves the right to short list the proposals received and arrange for interviews/oral presentations to the committee as part of the selection process.
- c. The City of Torrington shall select the proposal that is responsible and responsive and determined to be the best suited, most advantageous, and provides the greatest overall benefit to the City on the basis of the criteria and/or factors of evaluation listed. The City expressly reserves the right to negotiate with the selected Proposer prior to an award of any contract pursuant to this Request for Proposal.
- d The City reserves the right to reject any and all proposals and to waive any informalities or technical defects in any proposal. Non selection of any proposal will mean that another acceptable proposal was deemed to be more advantageous to the City of Torrington or that no proposal was accepted. Proposers whose proposals are not accepted will be so notified. Notification of non selected proposals will be devoid of any criticism of the proposal and of any implication that the proposal or proposed equipment was deficient.

17. COLLUSION:

Any act or acts of misrepresentation or collusion, shall be a basis for disqualification of any proposal or proposals submitted by such persons guilty of said misrepresentation or collusion. In the event that the City enters into a contract with any proposer who is guilty of misrepresentation or collusion and such conduct is discovered after the execution of said contract, the City may cancel said contract without incurring liability, penalty or damages.

18. GENERAL REQUIREMENTS AND CONDITIONS:

18.1 Taxes:

All deliveries of commodities or services hereunder shall comply in every respect with all applicable laws of the Federal government and/or the State of Connecticut. Purchases made by the City of Torrington are exempt from payment of Federal Excise Taxes and the Connecticut Sales Tax and such taxes must not be included in proposal prices. Federal Excise Tax exemption certificates, if requested, will be furnished.

18.2 Hold Harmless Agreement:

The Proposer shall indemnify and hold harmless the City and their agents and employees from and against all claims, damages, losses, and expenses, including attorney's fees of counsel selected by the City, arising out of or resulting from the performance of the work, and/or the supplying of materials, provided that any such claim, damage, loss or expense

(a) is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property including the loss of use resulting therefrom and (b) is caused in whole or in part by any negligent act or omission of the Contractor, any Subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, regardless of whether or not it is caused in part by a party indemnified hereunder.

18.3 Affirmative Action Policy:

The City of Torrington is an equal opportunity employer, and requires an affirmative action policy for all of its Contractors and Vendors as a condition of doing business with the City, as per Federal Order 11246. By submitting a Proposal for this RFP, all vendors and contractors agree to this condition of doing business with the City and should the City choose to audit their compliance, the vendor agrees to cooperate fully.

18.4 Assignment:

Assignment by the successful respondent to a third party of any contract based on the RFP or any monies due is prohibited and will not be recognized by the City of Torrington unless approved by the City in writing.

BUSINESS PROCEDURE

 Northeast Utilities System	SUBJECT STREET LIGHTING: MUNICIPAL- OWNED EQUIPMENT	NAME & NUMBER NB-208
	DATE REVISED March 2006	DATE EFFECTIVE August 21, 2006

I. PURPOSE

To set forth a policy for providing electric supply for street and security lighting where the lighting equipment is owned (or leased) and maintained by a municipality and the Company is relieved of the expense and investment in equipment and facilities used exclusively by the municipality for street and security lighting with the exception of dedicated street lighting conductors.

II. SCOPE

This policy applies only to the street and security lighting owned (or leased from third parties) and maintained by the municipality within a specifically defined geographic area of that municipality and receive service under CL&P Rate 117.

III. POLICY

A. General Policy

1. Under CL&P Rate 117, it is the municipality's responsibility to provide, own and maintain the luminaire, lamp, photocell, bracket, fixture wire, conduit, hardware and ownership identification labels except for the fixture wire molding and connectors which will be supplied by the Company at the municipality's expense after the initial connection of a new street light or security light. The Company will make the initial connection to its distribution system at no charge to the municipality. Poles used exclusively for street lighting must be owned, installed, and maintained by the municipality.
2. Dedicated street lighting conductors will be owned and maintained by the Company at no charge to the municipality.
3. Municipal-owned street lighting service is available under CL&P Rate 117. The lighting qualifying for partial street lighting service shall consist of all street lighting equipment within a specifically defined geographic area of the municipality. For purposes hereof, such a specifically defined geographic installation area of a municipality's street lighting equipment shall consist of not less than all lighting equipment on a public way lying between the intersections of that public way and two other public ways or one other public way and a dead end or the municipality's boundary.
4. A municipality may purchase street lighting equipment over a period not to exceed five years. If the Municipality elects to phase-in the purchase of its street lights over multiple years, the Municipality must purchase all street lights billed to the municipality's accounts within five years from the date of the first purchase. All purchase phases shall consist of contiguous geographic sections, as described in paragraph 3.

BUSINESS PROCEDURE

 Northeast Utilities System	SUBJECT STREET LIGHTING: MUNICIPAL-OWNED EQUIPMENT	NAME & NUMBER NB-208
	DATE REVISED March 2006	DATE EFFECTIVE August 21, 2006

5. Upon Written request, the Company will provide the municipality with an estimated purchase price. This price will be held firm for a period not to exceed six months. Adjustments will be made, as necessary, for depreciation, installations, removals and changes that occur subsequent the calculation of the estimated purchase price.

B. Rates

1. The monthly charges for municipal-owned street lighting service shall be in accordance with CL&P Rate 117 in effect at the time of service.
2. As approved in CL&P Rate 117, a monthly charge has been assigned to the most common types and sizes of light sources. The total lamp and ballast wattage has been used to determine the charge. Twin lamps are billed at twice the listed charges. For light sources other than those listed, the appropriate charge will be determined by the total lamp and ballast wattage multiplied by the applicable charge per watt shown in the Partial Street Lighting Rate under "Other Wattage's."

C. Agreement

A signed agreement will be required between the Company and the municipality electing to take service under CL&P Rate 117. The agreement defines the specific responsibilities required by the rate and the inventory of the municipal-owned lights. A sample agreement is shown in Exhibit NB-208-A.

IV. CONDITIONS/REQUIREMENTS

A. Point of Service/Character of Service

The point of service shall be designated by the Company. The Character of Service shall normally be unmetered, 60 hertz, alternating current, 120 volts. If an extension of the Company's distribution facilities is required for municipal-owned street lighting service only, the municipality will pay for the total cost of installation. Whenever possible, NB-2 will be used to derive the customer charges. When required construction includes items not listed in NB-2, the charges will be computed by alternate means.

B. Equipment

The equipment to be installed and connected to the Company's facilities must be acceptable to the Company and other joint users or prior licensees.

1. Only luminaires, mounting brackets and accessories which meet Company standards and applicable codes, or have received prior Company approval as equal or compatible with Company standards, will be acceptable for installation and connection to the Company's distribution system.

BUSINESS PROCEDURE

 Northeast Utilities System	SUBJECT STREET LIGHTING: MUNICIPAL-OWNED EQUIPMENT	NAME & NUMBER NB-208
	DATE REVISED March 2006	DATE EFFECTIVE August 21, 2006

2. Municipal-owned equipment must include controls for daily dusk (one-half hour after sunset)-to-dawn (one-half hour before sunrise) operation, resulting in annual illumination of approximately 4,150 hours.

The municipality is responsible for all repair or replacement of inoperative fail-on type lighting controls within 30 days of failure. The Company reserves the right to conduct periodic inspection of municipal-owned equipment for fail-on operation of municipal lights. Repair or replacement of defective controls shall be made within 30 days of failure or within 10 days of written notification by the Company, or the equipment will be disconnected at the expense of the municipality.

3. Installations requiring operating conditions and times other than shown in B.2, above, shall be served on a metered service or the Unmetered Electric Service Rate, if they qualify.
4. Municipal-owned equipment shall contain the lamp type and size as recorded with the Company and shall be subject to a periodic field audit to confirm same. If additional lamps have been installed, or larger size lamps are found in the equipment and previously unreported as a change, the Company will correct the billing and seek restitution under Section 16-259a of the Connecticut General Statutes.

C. Records

Record keeping, as well as the engineering design, layout, mapping and written notification to the Company of changes on the system, shall be the responsibility of the municipality. For all new installations, the initial requests for service must include a map or detailed drawing showing the location by pole number; type, number and size of the lamp(s) to be installed.

All subsequent changes to an existing municipal-owned system, other than replacements of like size and type, must be reported to the Company within 30 days of the time of change. All changes must be reported (Attn: –Project Manager – Streetlighting Billing and Accounting Department) in a format as shown on Exhibit B of Exhibit NB-208-A.

D. Installations and Removal

1. The Company will designate the character of service and point of connection.
2. If necessary, the Company will extend its distribution facilities to a designated point of service and bill the municipality the Company's installation cost for that extension. Whenever possible, NB-2 will be used to derive the municipal charges. When required construction includes items not listed in NB-2, the charges will be computed by alternate means.
3. The Company, upon request, will rearrange existing distribution facilities, as required, to install a new fixture or relocate an existing fixture on an existing pole, when it has been determined by the Company that such work is feasible and the

BUSINESS PROCEDURE

 Northeast Utilities System	SUBJECT STREET LIGHTING: MUNICIPAL-OWNED EQUIPMENT	NAME & NUMBER NB-208
	DATE REVISED March 2006	DATE EFFECTIVE August 21, 2006

municipality agrees to pay the cost incurred (based on the Company's estimated costs). This does not preclude charges by other users such as telephone and cable television. Where such rearrangement also requires pole replacement, the municipality shall pay the estimated total cost plus the un-depreciated cost of the removed facilities with consideration for salvage.

4. The municipality may request attachment of municipal-owned street lighting equipment to Company-owned poles along streets and public ways be performed by the Company, such work will be performed by the Company at a charge to the municipality as shown in Exhibit NB-208-B under the following conditions:
 - a) Attachment is deemed feasible by the Company;
 - b) Consent of a joint-owner is either not required or can be obtained without cost to the Company;
 - c) Attachment does not conflict with existing attachments or rights of any other licensee;
 - d) Attachment does not require the consent of a private property owner (or consent is obtained).
 - e) Attachment includes the mounting of the bracket on the pole (Company or joint-owned pole) and the connection of the fixture conductors to the Company secondary conductors. The initial connection of a new street light to the Company's distribution system will be at no charge to the municipality.

5. The municipality may elect, at its sole cost, liability and expense, to have a qualified contractor or qualified municipal employees attach the municipality's street lighting equipment to Company owned poles provided the municipality:
 - a) Obtains consent from the Company that the attachment is feasible without modifications to the pole or the municipality pays for any necessary modifications.
 - b) Obtains the consent of all other joint-owners of the pole if required without cost to the Company.
 - c) Attachment does not conflict with existing attachments or rights of any other licensee.
 - d) Attachment does not require the consent of a private property owner (or consent is obtained).
 - e) Connection and disconnection to the Company's distribution system will be made by the Company following receipt of a written notice from the municipality that its street lighting equipment has been attached. This

BUSINESS PROCEDURE

 Northeast Utilities System	SUBJECT	NAME & NUMBER
	STREET LIGHTING: MUNICIPAL-OWNED EQUIPMENT	NB-208
DATE REVISED	DATE EFFECTIVE	ISSUED BY
March 2006	August 21, 2006	Director-Operations Support

attachment includes the connection of the fixture conductors to the Company secondary conductors. The initial connection of a new street light to the Company's distribution system will be at no charge to the municipality. Under no circumstances shall a municipally owned street light be connected to or disconnected from the Company's distribution system by anyone other than authorized Company personnel.

6. Except as provided in paragraph 5, a municipality's work is limited specifically to maintenance work which includes such items as cleaning of fixture parts, relamping, replacing photo controls, replacing glassware and luminaire replacements or adjustments. All work shall be performed in accord with applicable safety codes. It will be the municipality's responsibility to ensure that no electrical potential exists between the fixture and ground.
7. All newly installed municipal-owned equipment must include an ownership identification marking or label, on the fixture, which is readily visible from the ground during daylight hours. All municipal-owned luminaires purchased from the Company shall be labeled by the municipality at the time of sale but in no case later than six (6) months from the time of sale. In addition, the equipment shall have lamp fixture identification in accordance with the latest "ANSI Standard for High Intensity Discharge Lamps and Luminaires" (ANSI Publication C136.15 - 1980 and subsequent revisions).
8. Luminaires to be installed on overhead distribution poles by the Company will be supplied to the Company by the municipality complete with bracket, lamp, photocell, labels, fixture wires and glassware. Fixture wire molding and connectors will be supplied by the Company at the municipality's expense, except in the case of the initial connection of a new street light or security light to the Company's distribution system which will be at no charge to the municipality. Company-owned equipment will not be loaned, sold, exchanged or used for repair of municipal-owned street lighting equipment.
9. Luminaires on municipal-owned poles supplied from the Company's underground system, conduit system or direct burial distribution facilities will be connected to the Company's facilities at the base of the pole. The cost of extending facilities to that location will be borne by the municipality. The initial connection at the base of the pole of a new street light to the Company's distribution system will be at no charge to the municipality.
10. The Company shall have the right, but not the obligation, to inspect and discontinue service to any municipal-owned equipment which, in the opinion of the Company, has or will become unsafe for any cause beyond the Company's control or which has been connected to the Company's distribution system by unauthorized personnel. The municipality shall be promptly notified of this action.
11. When it is necessary to relocate, replace, or transfer municipal-owned equipment to substitute poles or to perform any other work in connection with said equipment that may be required by the Company or the joint-owners, such work will be

BUSINESS PROCEDURE

 Northeast Utilities System	SUBJECT STREET LIGHTING: MUNICIPAL- OWNED EQUIPMENT	NAME & NUMBER NB-208
DATE REVISED March 2006	DATE EFFECTIVE August 21, 2006	ISSUED BY Director-Operations Support

performed by the Company or by the municipality's qualified contractor or qualified municipal employees at the municipality's expense.

Normally, 30 days' notice of required work will be provided to the Company. In an emergency, the Company will remove, relocate or replace the municipality's equipment and the municipality shall be billed by the Company in accordance with the charges set forth in Exhibit NB-208-B.

12. Municipal requests for installation, removal, connections or disconnects by the Company will be scheduled during normal working hours and within the requirements of the work management system. Emergency and/or unusual conditions will merit special attention.
13. When the municipality requests the Company to fix a service to a municipal-owned street light and the problem is found to be with the municipal-owned street lighting equipment, the municipality will be billed the Company's actual cost for the service call.

E. Special Condition

With notification (30 days when possible), the Company shall remove municipal-owned equipment from Company-owned facilities which are no longer required for Company or municipal purposes, or the municipality may purchase such Company-owned facilities as the municipality requires. The cost of such purchase shall be un-depreciated value of the facilities.

F. Maintenance of Dedicated Street Lighting Conductors

Dedicated street lighting conductors will be owned and maintained by the Company.

G) Qualifications for Contractors and Municipal Employees

Any contractor or municipal employee utilized by the municipality to perform street light maintenance work on Company owned poles shall be properly trained, certified (i.e., licensed) and, in the case of a contractor, properly insured, prior to performing such work. Such work shall be performed in accordance with all applicable federal, state and local laws, regulations, safety codes and ordinances.

Prior to the commencement of any work on Company or jointly owned poles, the municipality shall provide written certification to CL&P in the form of Exhibit NB-208-C.

THE CONNECTICUT LIGHT AND POWER COMPANY
AGREEMENT FOR SERVICE UNDER
RATE 117 - PARTIAL STREET LIGHTING SERVICE

This is an agreement entered into as of the ____ day of _____, _____, by the ____ of _____ ("the Municipality"), and The Connecticut Light and Power Company ("the Company") for the supply of service under the Company's Rate 117 - Partial Street Lighting Service, as such rate may be amended from time to time. The Municipality agrees to take and the Company agrees to provide Partial Street Lighting Service for the Municipal-owned street lighting equipment described and located _____ (describe location/borders) _____ and further detailed on Exhibit A attached hereto (as the same may be amended from time to time), under the following conditions:

1. Street lighting Equipment - For purposes of this agreement the term "street lighting equipment" shall mean the bracket, luminaire, lamp, photocell, fixture conductor, wire, hardware and controls for daily dusk-to-dawn operation for each lighting unit, all of which are owned by the Municipality. When the Municipality owns the mounting pole, it shall also be deemed to be street lighting equipment.

All street lighting equipment shall bear an ownership identification marking or label which is readily visible from the ground during daylight hours. All street lighting equipment purchased in place from the Company shall be so identified at the expense of the Municipality no later than six (6) months from the time of purchase. In addition, street lighting equipment shall have lamp fixture identification in accordance with the latest NEMA or ANSI Standard for High Intensity Discharge Lamps and luminaires (ANSI Publication C 136.15 - 1980 and subsequent revisions).

Changes to the street lighting equipment shown on Exhibit A (as amended from time to time), other than replacement by like size and type, shall be reported to the Company within 30 days of the time of the change in the format as shown on Exhibit B. No street lighting equipment may be installed unless it includes controls for daily dusk (one-half hour after sunset)-to-dawn (one-half hour before sunrise) operation resulting in annual illumination of approximately 4,150 hours. Street lighting equipment may not be installed without a regulated or reactor ballast with a power factor of not less than 85%, or without attachments or connections made in accordance with the specifications of the National Electric Safety Code and Company specifications. Street lighting equipment shall at all times contain the lamp type and size as recorded with the Company and shall be subject to a periodic field audit by the Company to confirm same. If the Company finds lamps which are in addition to or larger than those reported by the Municipality, the Company will seek restitution under Section 16-259a of the Connecticut General Statutes.

2. Ownership of Street Lighting Equipment - The Municipality represents that it owns all the street lighting equipment described in Exhibit A. Dedicated street lighting conductors are owned and maintained by the Company.

If the Municipality elects to phase-in the purchase of its street lights over multiple years, the Municipality must purchase all street lights billed to the municipality's accounts within five years from the date of the first purchase.

3. Maintenance of Street Lighting Equipment - The Municipality shall maintain the street lighting equipment at its own expense. Maintenance shall not include connection or disconnection to the Company's distribution system, which shall be performed by Company personnel only. In performing such maintenance work the Municipality shall not permit its agents, employees or contractors to come into contact with the Company pole or any other Company property, that is, they shall not climb or otherwise ascend Company poles but shall maintain the street lighting equipment on such poles by using an aerial device.

The Municipality shall insure that any maintenance work performed by or on behalf of the Municipality, or any failure to perform any such maintenance, will not cause an electrical potential to be created between the street lighting equipment and the ground.

The Municipality shall repair and replace inoperative fail-on type lighting controls within 30 days of failure or within 10 days of written notification by the Company, whichever is earlier. If the Municipality fails to do so; the Company may disconnect the affected street lighting equipment at the expense of the Municipality.

The Company shall have the right, but not the duty, to inspect and discontinue service to any Municipality-owned street lighting equipment which, in the opinion of the Company, has become unsafe for any reason, or which has been connected to the Company's distribution system by unauthorized personnel. The Company shall promptly notify the Municipality of this action.

The company-owned dedicated street lighting conductors will be maintained by the Company at no charge to the Municipality.

4. Connection and Disconnection of Street lighting Equipment - Connection of street lighting equipment wire to, and disconnection from, the Company's distribution system will be performed by the Company personnel only upon written request of the Municipality at the expense of the Municipality. The Company will make the initial connection to its distribution system at no charge to the Municipality. Connections and disconnects will be scheduled during the Company's normal working hours and will require thirty days notice, unless emergency conditions require otherwise.

5. Installation, Removal, Replacement, Relocation and Transfer of Street Lighting Equipment
The services necessary to install, remove, replace, relocate or transfer street lighting equipment attached to Company poles may, at the municipality's option be performed by the Company or by the Municipality's qualified contractor or qualified municipal employees, at the expense of the Municipality. This involves attachment or removal of the bracket to/from the Company pole. The Municipality will provide the Company with any replacement street lighting equipment. Installation, removal, replacement, relocation and transfer performed by the Company will be scheduled during the Company's normal working hours and will require thirty (30) days notice, unless emergency conditions require otherwise. Company charges are contained in NB-208 as may be amended from time to time.

If the Municipality elects to use a qualified contractor or municipal employees to perform the removal, replacement, relocation, installation or transfer of the street light mounting bracket on Company owned poles, the Municipality will certify to the Company in writing that its contractors or municipal employees meet the qualifications as stated in NB-208, Conditions/Requirements, Section G. Such certification shall be provided in the form of Exhibit NB-208-C.

When the Municipality elects to have its qualified contractor or municipal employee attach or disconnect its street lighting equipment to a Company owned pole, it will first:

- a) Obtains consent from the Company that the attachment is feasible without modifications to the pole or the municipality pays for any necessary modifications.
- b) Obtains the consent of all other joint-owners of the pole if required without cost to the Company.
- c) Attachment does not conflict with existing attachments or rights of any other licensee.

- d) Attachment does not require the consent of a private property owner (or consent is obtained).
- e) Connection and disconnection to the Company's distribution system will be made by the Company following receipt of a written notice from the municipality that its street lighting equipment has been attached. This attachment includes the connection of the fixture conductors to the Company secondary conductors. The initial connection of a new street light to the Company's distribution system will be at no charge to the municipality. Under no circumstances shall a municipally owned street light be connected to or disconnected from the Company's distribution system by anyone other than authorized Company personnel.

When the Company determines it is necessary to relocate or transfer street lighting equipment to a substitute pole for any reason, such work will be performed by the Company or by the Municipality's qualified contractor or qualified municipal employees, at the expense of the Municipality. Examples of work requiring such a relocation or transfer includes, but are not limited to, such work required because of damage to the pole or support bracket from a storm or vehicle, and transfers necessitated by the relocation or removal of the supporting pole. Except in the case of emergency, the Company will attempt to give 30 days' notice to the Municipality of any proposed relocation or transfer of street lighting equipment.

If a third party is or may be liable for payment of some or all of the expense of removal, replacement, relocation and transfer of street lighting equipment, the Company will attempt to recover such expense from such third party, but such action shall not excuse the Municipality from payment of such expense subject to reimbursement of any portion of such expense recovered by the Company.

6. Billing - All work performed by the Company at the expense of the Municipality shall be billed to the Municipality monthly, with reasonable itemization, at the Company's then current rates for such work. All such bills shall be payable when rendered; bills paid more than 60 days after billing shall bear interest at the rate of 1 percent per month from the date of billing.

7. Rates - All charges shall be in accordance with Rate 117 - Partial Street Lighting Service in effect at the time of service. For light sources other than those listed in Rate 117, the appropriate charge will be determined by the total lamp and ballast wattage multiplied by the applicable charge per watt shown in Rate 117 under "Other Wattages." No credit shall be allowed for inoperative fixtures.

8. Indemnification - The Municipality shall indemnify and hold harmless the Company and all other owners of poles to which street lighting equipment is or may be attached from and against all claims, costs, liabilities, losses, judgments and expenses, including reasonable attorneys' fees, that may arise to, or be suffered by, any of them as a result of the Municipality's ownership or control of the street lighting equipment or occasioned wholly or in part by any act or omission of the Municipality, its agents, employees or contractors in performance of maintenance, installation removal, replacement relocation transfer or other activities involving such street lighting equipment, or the Company's distribution system.

9. Amendment of Exhibit A - The addition of street lighting equipment to that listed in Exhibit A shall be subject to mutual agreement between the Company and the Municipality and shall be subject to the Company rules and regulations with respect to acceptable fixtures and installation practices. Removals or abandonments of street lighting equipment listed in Exhibit A shall be at the option of the Municipality, provided that no such equipment shall be removed or abandoned if it would result in a violation of the conditions of Rate 117. Street lighting equipment deleted from Exhibit A shall be removed from Company owned poles by the Company or by the Municipality's qualified contractor or qualified municipal employees at the Municipality's expense.

Each amendment to Exhibit A shall be evidenced in writing, which shall be in the format as shown on Exhibit B, executed by the Municipality and the Company, and shall define the effective date.

10. Pole Space Charges - As of the date of this agreement no pole rental fee for street lighting attachments has been approved by the DPUC. Nothing herein contained shall preclude the owner(s) of any pole to which any street lighting equipment may be affixed under the terms of this agreement from hereafter charging such annual pole rental or use fee as may be approved by the Department of Public Utility Control of the State of Connecticut after a hearing held pursuant to Section 16-19(s) of the Connecticut General Statutes.

9.	Disconnect Post Top or Ornamental Pole Luminaire	\$173 \$101	16 Units

* Each individual work project can be considered as part of a group if the work location is within one-half mile of the previous work location and done on the same day.

The municipality will be billed the Company's actual costs for all work for emergency conditions that require the Company to verify the safety of CL&P's facilities or to make CL&P's facilities safe.

MUNICIPAL CERTIFICATION OF CONTRACTOR AND EMPLOYEE QUALIFICATIONS

Municipality _____

a. Name of Municipal Official Providing Certification: _____

Contractor/Municipal Employee Information

a. (Contractor) Name: _____

b. Home Office/Headquarters:

Address: _____

Phone Number: () _____

Fax Number: () _____

Certification

The Municipality hereby certifies that the Contractor/Employee referenced above is properly trained, certified and licensed, and in the case of a contractor, insured, to perform installation, removal, replacement, relocation, transfer and maintenance work on street lighting equipment in close proximity to high voltage electrical conductors (the "Work"), and that such Contractor/Employee is authorized by the Municipality to perform such Work on its behalf. The Contractor/Employee is required to perform the Work on behalf of the Municipality in accordance with all applicable federal, state and local laws, regulations, safety codes and ordinances.

The Municipality further certifies that all individuals performing Work on its behalf on street lighting equipment have received full and adequate safety training. The Municipality acknowledges that the Company shall rely on this certification as proof of the qualifications of such Contractor/Employee. The Municipality shall indemnify and hold harmless the Company and all other owners of poles to which street lighting equipment is or may be attached from and against all claims, costs, liabilities, losses, judgments and expenses, including reasonable attorneys' fees, that may arise to, or be suffered by, any of them as a result of the Municipality's ownership or control of the street lighting equipment or occasioned wholly or in part by any act or omission of the Municipality, its agents, employees or contractors, in the performance of Work or any other activities of such persons involving such street lighting equipment or the Company's distribution facilities.

Dated as of this ___ day of _____, 20__.
