

## Minutes of Wayland SWQC Meeting, 1 June, 2011

Prepared by Bob Goldsmith

Present: Mike Lowery, Bob Goldsmith, Lin Bradford.

1. The meeting came to order at 7:30 PM. There was no public comment.
2. Minutes of the previous meeting were approved 3-0.
3. Dudley Pond
  - a. Circulators not yet repaired. Awaiting quote from supplier for parts for motors.
  - b. 89 hours have been spent hand pulling weeds with a sparse milfoil population found and removed. Divers will be stopped until/unless more milfoil is obviously present.
  - c. A heavy infestation of curly leaf is present. Possible action will be discussed at next meeting.
  - d. Given the flow of raw sewage into the pond and concern about pathogen contamination, the committee voted 3-0 to conduct three samplings at two points for analysis. These are Mansion Beach and the middle of the cove where the failed septic system is located. Mike will coordinate with the BOH.
4. North Pond.
  - a. DCR (Tom Flannery) conducted a survey and reported a small milfoil population. This does not correspond to Lin's observations.
  - b. Lin continues to clean the weed barrier at the pond entrance frequently and is reporting a moderate to large quantity of weeds collected. Many fragments are passing the barrier into North Pond.
5. Heard Pond. No discussion
6. Mike and Lin (and spouses) attended a very early morning sampling training program at OARS for sampling the Sudbury River. Following training, they conducted sampling as part of the river monitoring program.
7. The committee voted 3-0 to adjourn at about 8:30 PM.
