Member Kelley discussed the 300 Anniversary Fireworks Display, Member Kelley stated that there are several areas around Lake Chauncy that are protected stating that this is not a good location for the display. The perchlorate that is in the fireworks can get into the water in a few ways, from atmospheric fall out, the duds that fall back into the water, and the mis-fires that explode too early. The perchlorate can affect the drinking water and it can also effect the fish population, it's unclear how quickly the perchlorate will work through the ecosystem but it will affect them regardless. The Commission then discussed when they will be giving the Board of Selectmen their memo on the matter.

Member Kelley motioned to adjourn seconded by Member Donley Time of Adjournment_7:30pm__

Respectfully Submitted,
Sheri Rullie, Administrative Assistant

Chairman Koenigsberg
