

## **Parks Facilities Committee (PFC) Meeting Minutes – May 10, 2012**

PFC Attendees: Patrick Crowley, Patrick Inderwish, John O'Brien, John Owanisian, Christopher Rucho

- PFC chair Mr. Inderwish called the meeting to order at 6:36 PM.
- The meeting took place at the West Boylston multi-purpose field (football field near high school).
- A motion to approve minutes of the April 19, 2012 PFC meeting was approved.
- The meeting focused on an assessment of conditions at the multi-purpose field with the intention of proposing a preservation project (Goodale Park Phase 2 Project) for the facility to include the following features:
  - Installation of artificial turf field that is reoriented to run roughly north-south (current field is roughly east-west)
  - Installation of new bleachers with press box
  - Installation of inner running track with an outer walking track (tracks separated by fence)
  - Addition of parking in the area of current pool structure
  - Installation of new lighting system
  - Replace and relocate scoreboard
  - Install sanitary facilities and concession stand
  - Reconfigure access points and ensure ADA access
- Mr. Inderwish identified current issues that include significant runoff from the multi-purpose field onto Crescent St., as well as the accumulation of standing water on the field due to poor drainage.
- Mr. Inderwish proposed a new field should extend into the hill (bleacher area) to accommodate a wider running/walking track.
- It was proposed that the PFC would make a presentation about the overall project at the Fall 2012 town meeting, with the intention of obtaining funds through a warrant article for an architectural study.
- Discussion indicated the PFC would reconvene after the May 21 town meeting.
- There being no further business to discuss, meeting was adjourned at 7:41PM.
