

Non-Native Invasive Plant Species: Identification & Control

WHERE: Front Bay Park
Bay Street
Wolfeboro, NH

WHEN: Saturday, October 4, 2014

TIME: 10:00 am – 12:00 pm

For more information:

Contact Wendy Scribner,
wendy.scribner@unh.edu or Betty Lou Canty
bettylou.canty@unh.edu or call the office at
447-3834.

Chances are you drive by them every day, and maybe you even wrestle with them in your own back yard. **Non-**native, invasive plant species such as oriental bittersweet, Japanese knotweed, and glossy buckthorn have become well established in our landscape. There are ways to control these species and even eradicate them from your property.

Join Wendy Scribner, Carroll County Forester UNH Cooperative Extension, and members of the Wolfeboro Conservation Commission for a discussion on identifying and controlling invasive plants found in Wolfeboro.

We will be meeting at Wolfeboro's Front Bay Park located along Bay Street. Over the past few years, the Conservation Commission has worked to control the invasive plants that are threatening to overtake this local resource.

This is FREE to the public and all are welcome to attend.

Sponsored by: UNH Cooperative Extension – Carroll County in cooperation with the Wolfeboro Conservation Commission.
