

**WOLFEBORO CONSERVATION COMMISSION
DREDGE & FILL MEETING
November 19, 2010**

Members Present: Dan Coons, Chairman, Mike Hodder, Vice-Chairman, Ed Roundy, Member.

**Raymond Berweger
39 Camp School Road
Rust Pond
TM #245-28
Minimum Impact Expedited**

The applicant proposes to dredge 6 cubic yards and excavate 720 SF along 30' of shoreline to widen existing 11'x24' sloped beach to 30'x24', regrade beach, replenish with 10 cubic yards of sand, stabilize slopes with 1' wide walls on 157' of frontage.

Referencing the Raymond Berweger Minimum Impact Expedited application, TM #245-28, the Wolfeboro Conservation Commission noted that while they are in favor of the applicant correcting the existing erosion into the lake, they object to the application for the following reasons; the diagram/design does not reflect a perched beach, the natural shoreline is not proposed to be left intact, the plans are required to be at scale, no erosion control measures are noted on the plan and the Commission is not in favor of dredging the lake. The Commission questioned whether a Standard Dredge & Fill application is required.
