

**WOLFEBORO CONSERVATION COMMISSION
DREDGE & FILL MEETING
August 5, 2010**

Members Present: Dan Coons, Chairman, Mike Hodder, Vice-Chairman, Ed Roundy, Randy Tetreault, Gail Antonucci, Members.

Randy Tetreault abstained from the Palmer applications.

**Alison & Peter Palmer
Whitegate Road
TM #215-5 & 6
Standard Dredge & Fill**

The applicant proposes to replace an existing undersized culvert under Whitegate Road and relocate approximately 500' of Whitegate Road in order to eliminate abrupt horizontal and vertical alignment and to improve sight distance.

The Wolfeboro Conservation Commission noted no objection to the Alison & Peter Palmer Standard Dredge & Fill application, TM #215-5 & 6.

**Omer Revocable Trust
41 Crystal Shore Road
Lake Winnepesaukee
TM #191-63
Permit By Notification**

The applicant proposes to replenish beach sand.

The Wolfeboro Conservation Commission noted no objection to the Omer Revocable Trust Permit By Notification application, TM #191-63, however, recommended adding a filtration barrier to reduce exfiltration.

**Peter Palmer
36 Whitegate Road
Lake Winnepesaukee
TM #215-6
Permit By Notification**

The applicant proposes to replace existing cribs and docking structure.

Referencing the Peter Palmer Standard Dredge & Fill application, TM #215-6, the Wolfeboro Conservation Commission objected to the application, as such is identical to the application submitted in 2005; noting there is no evidence that the proposal meets the definition of a grandfathered structure. If it is determined to be grandfathered, the Commission would prefer to see an allowance for water passage.
